SeedQR templates

for SeedSigner and compatible signers, like NDS-Signer

github.com/ndssigner/seedcraft

A **SeedQR** is a QR code that holds a BIP-39 seed, to be copied by hand onto paper or metal and scanned instead of typing the words. Copying one square by square is slow. These templates already have every fixed part drawn — the three big squares, the dotted lines, the small square and the **format cells** — so you only copy the white squares. There is one template per size and **mask**.

A filled template is your seed. Fill it in alone, offline, and keep it as safe as the words. Use a permanent black pen: pencil fades and smudges.

Which size

	12 words	24 words
Standard SeedQR	25 × 25 · 359 squares	29 × 29 · 567 squares
CompactSeedQR	21 × 21 · 208 squares	25 × 25 · 359 squares

The Compact kind is smaller, so quicker to copy; both kinds hold the same seed and every signer that reads one reads the other. A 25 × 25 template is the same for a 12-word Standard and a 24-word Compact SeedQR.

How

1. **Show the SeedQR** on your signer. In SeedSigner: Backup Seed ⟶ Export as SeedQR, then pick a size (for example "Compact: 21x21"). It shows the code zone by zone, with a grid, so it can be copied.

2. **Find its mask.** Look at row 9 and column 9 next to the top-left big square, and find the matching drawing in the mask table (next page).

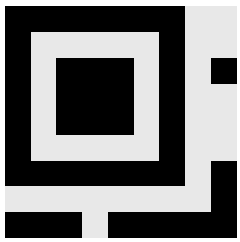

3. **Take the template** for that size and mask. Its black and grey squares match the code; grey means light.

4. **Copy the white squares** row by row, left to right: fill in the dark ones, leave the light ones. The number at the right of each row says how many white squares it has.

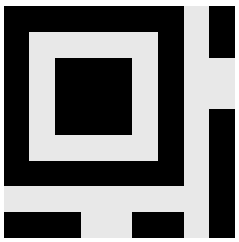

5. **Check it**: scan the copy with the signer (SeedSigner offers "Confirm SeedQR" after showing it). If it does not scan, compare row by row.

Masks

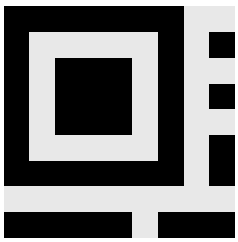

The top-left corner of a SeedQR (rows and columns 1–9). Its 15 format cells — row 9 and column 9 — tell the mask, the same in every size.

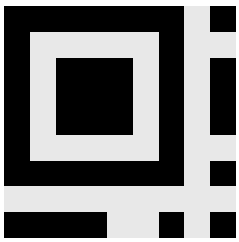

mask 0 · `000`

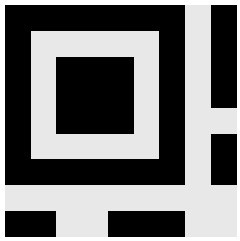

mask 1 · `001`

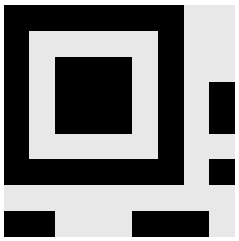

mask 2 · `010`

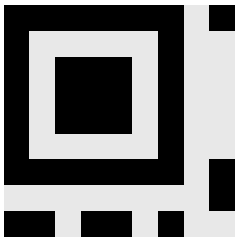

mask 3 · `011`

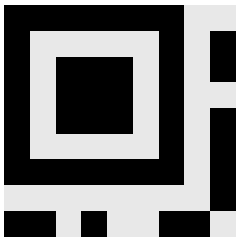

mask 4 · `100`

mask 5 · `101`

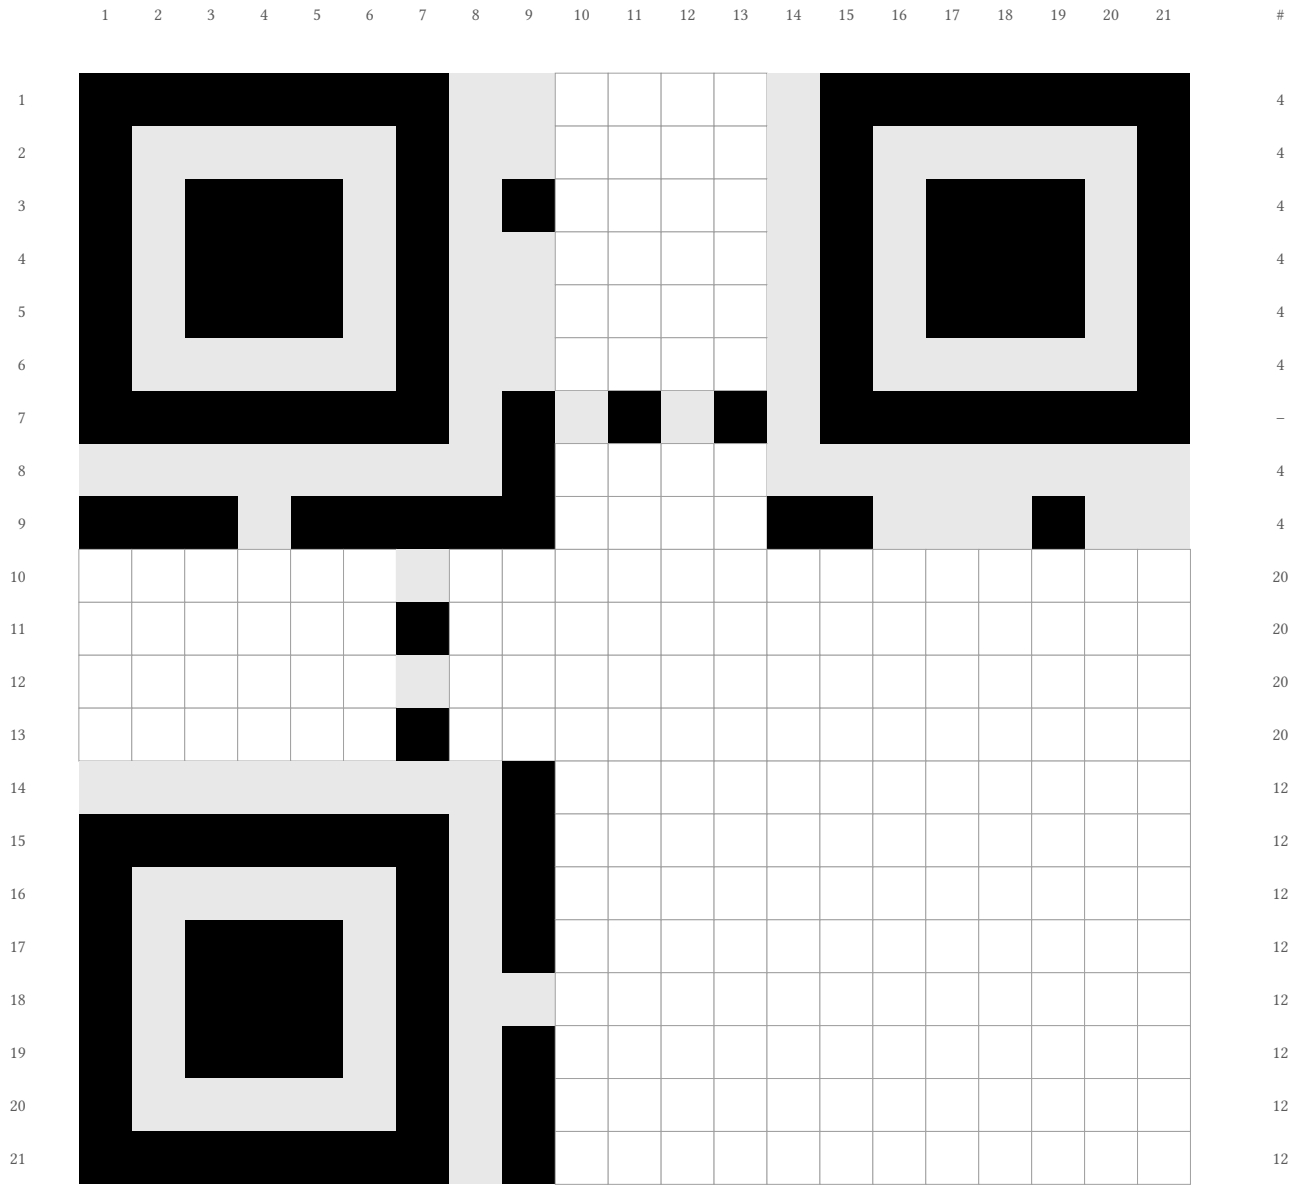

mask 6 · `110`

mask 7 · `111`

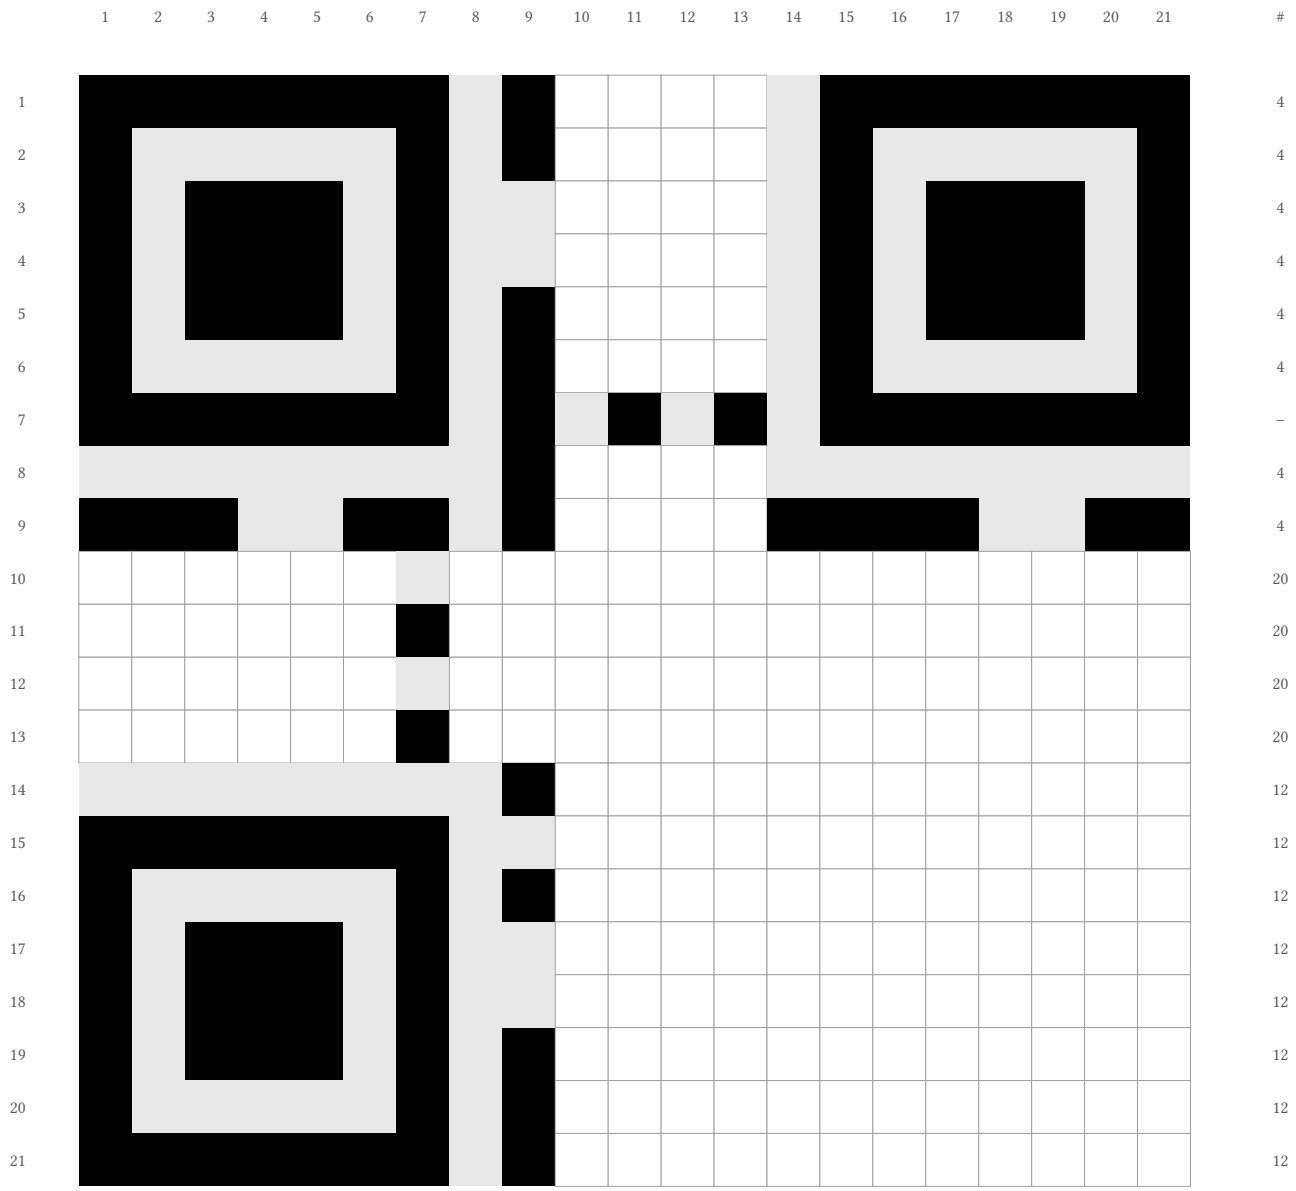

Template 21 × 21 · mask 0

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

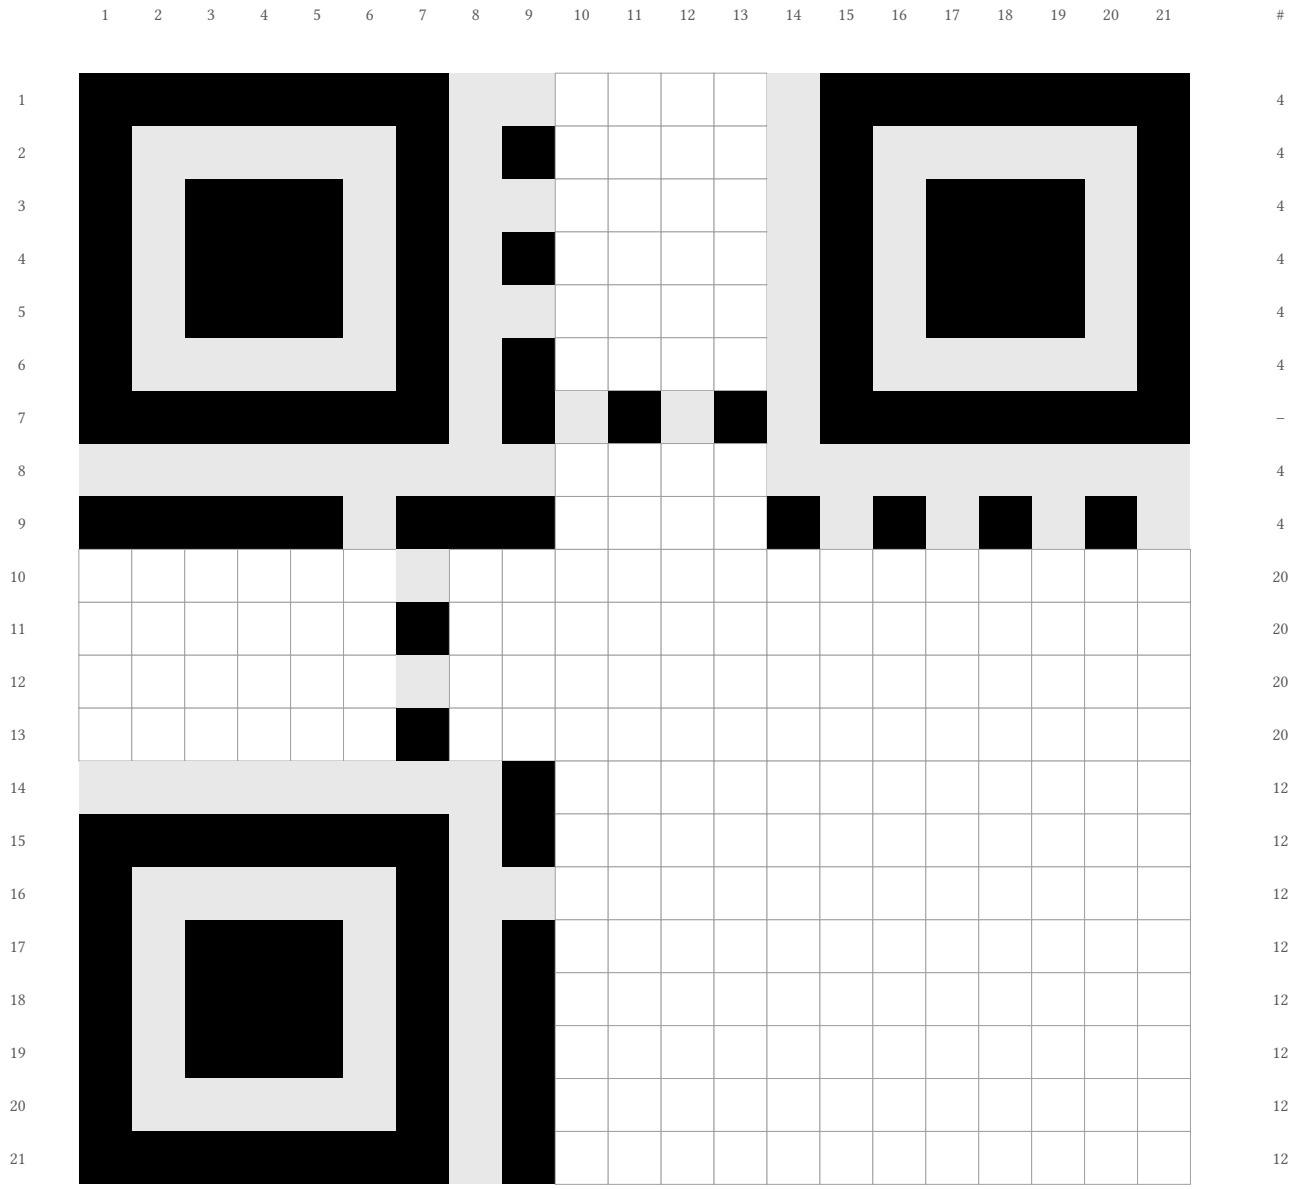

Template 21 × 21 · mask 1

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

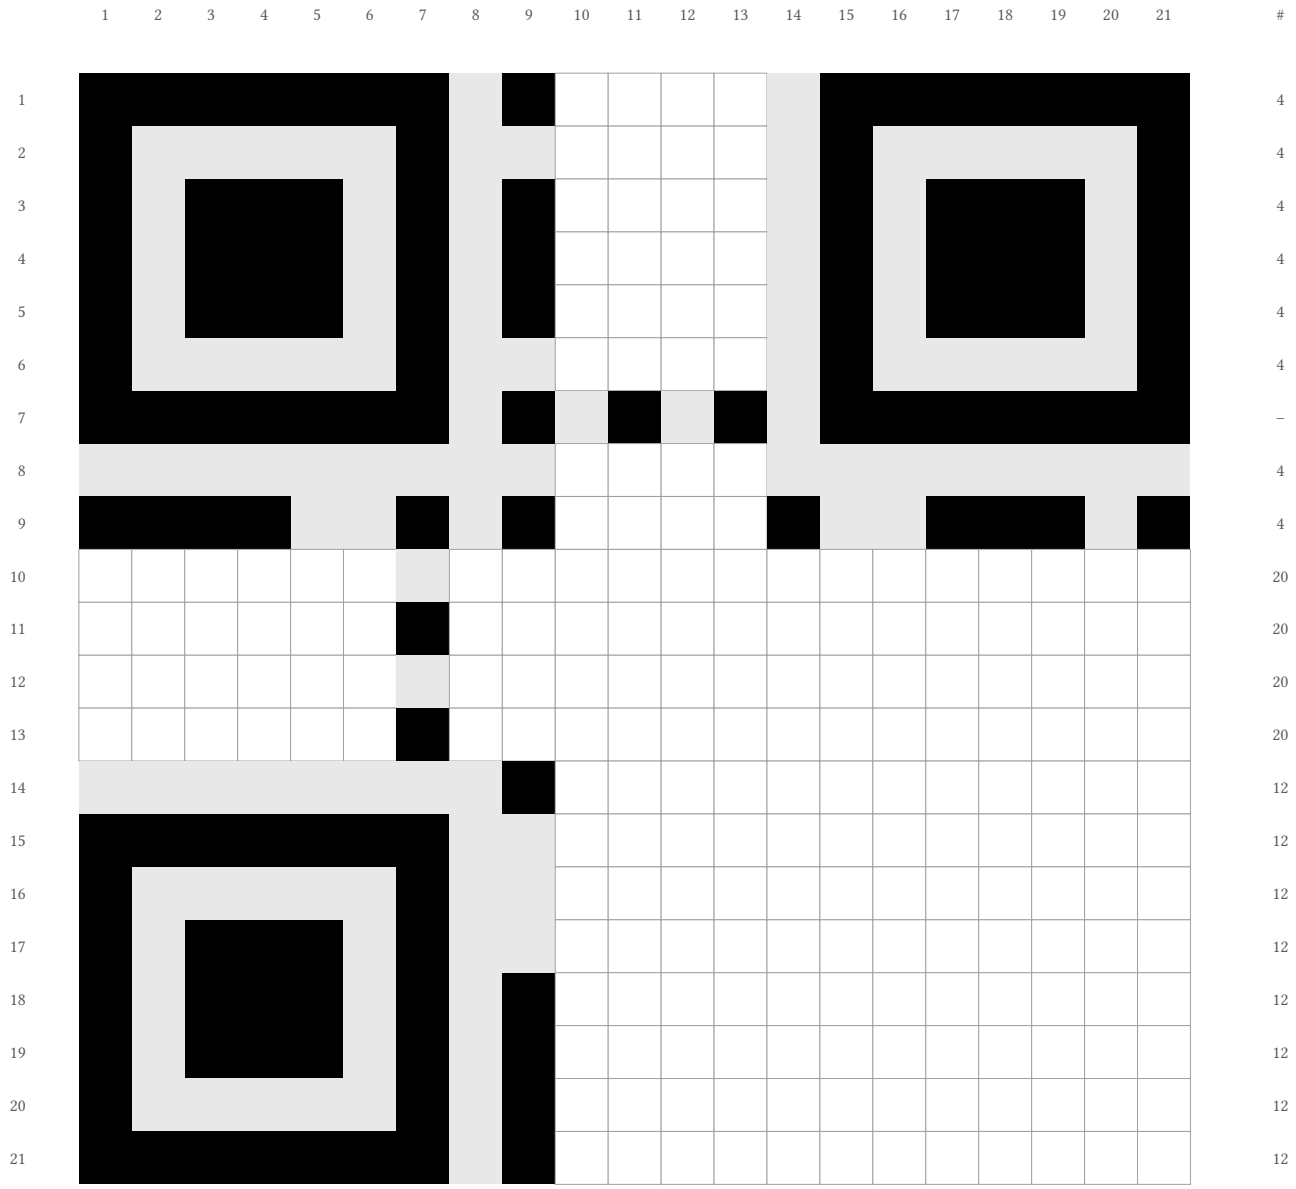

Template 21 × 21 · mask 2

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

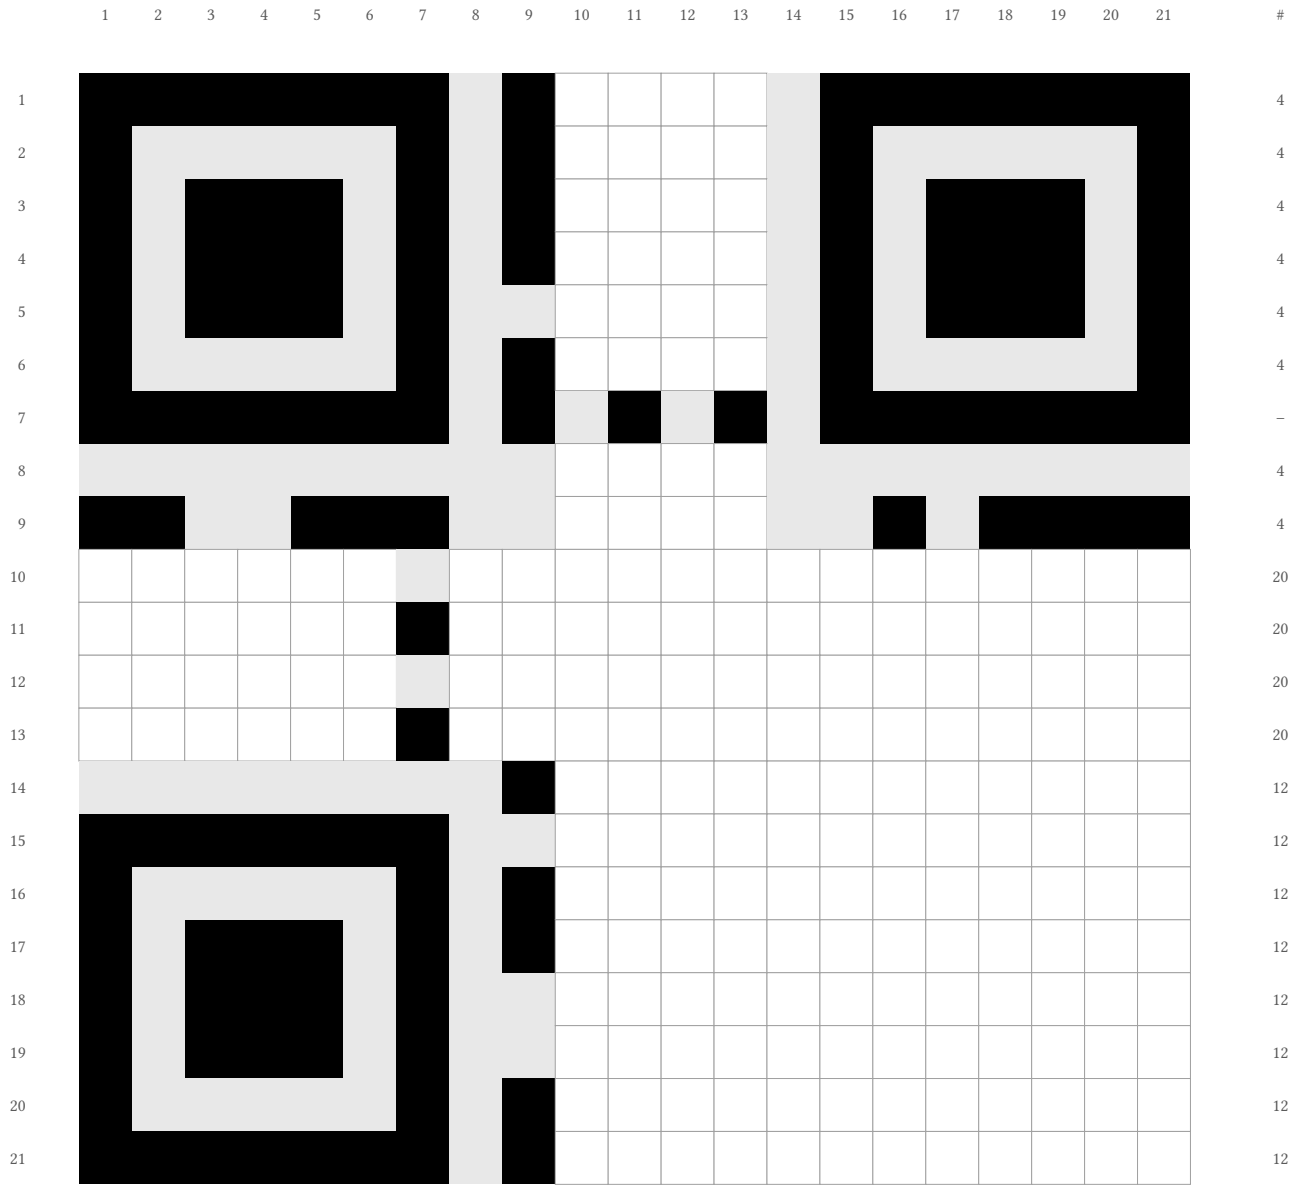

Template 21 × 21 · mask 3

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

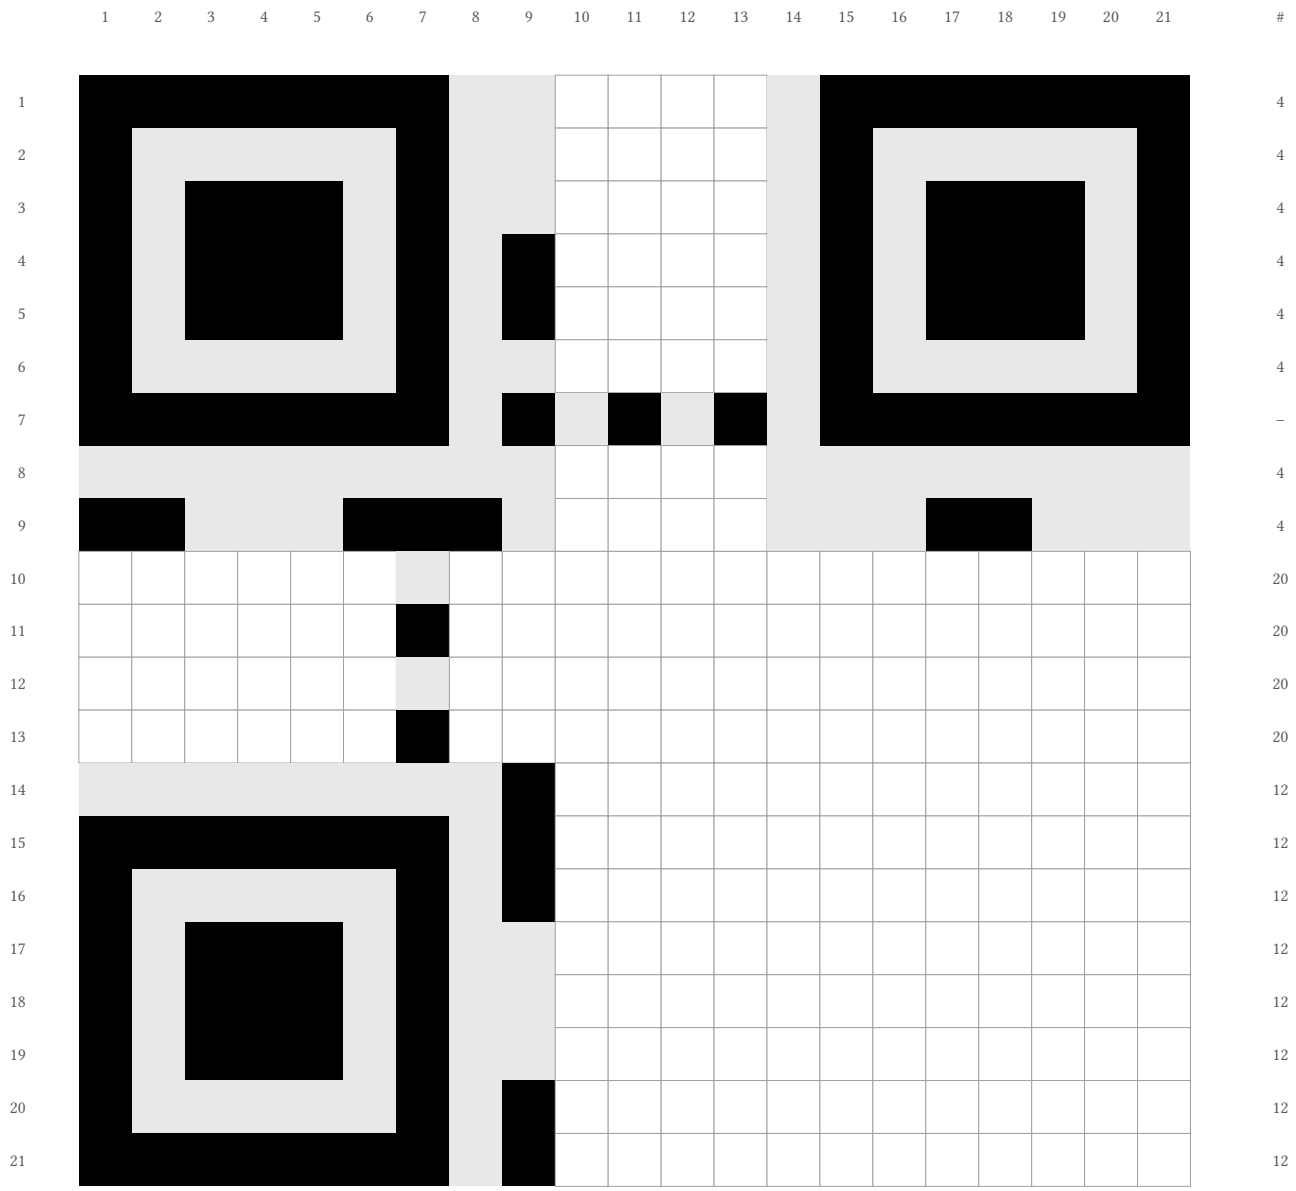

Template 21 × 21 · mask 4

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

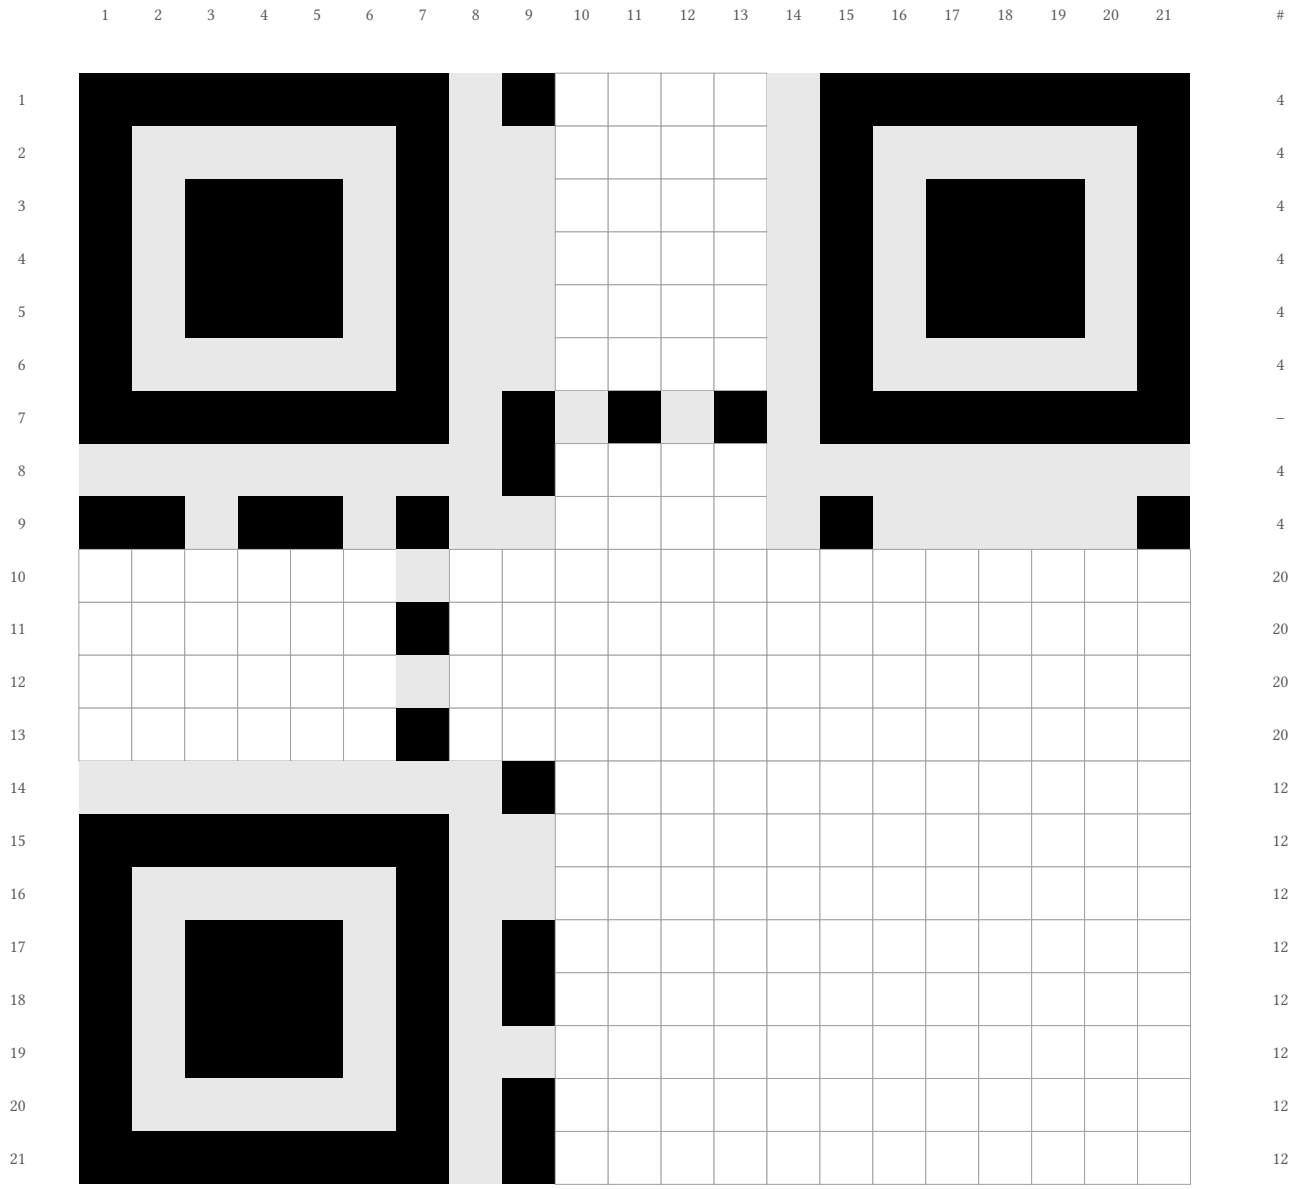

Template 21 × 21 · mask 5

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

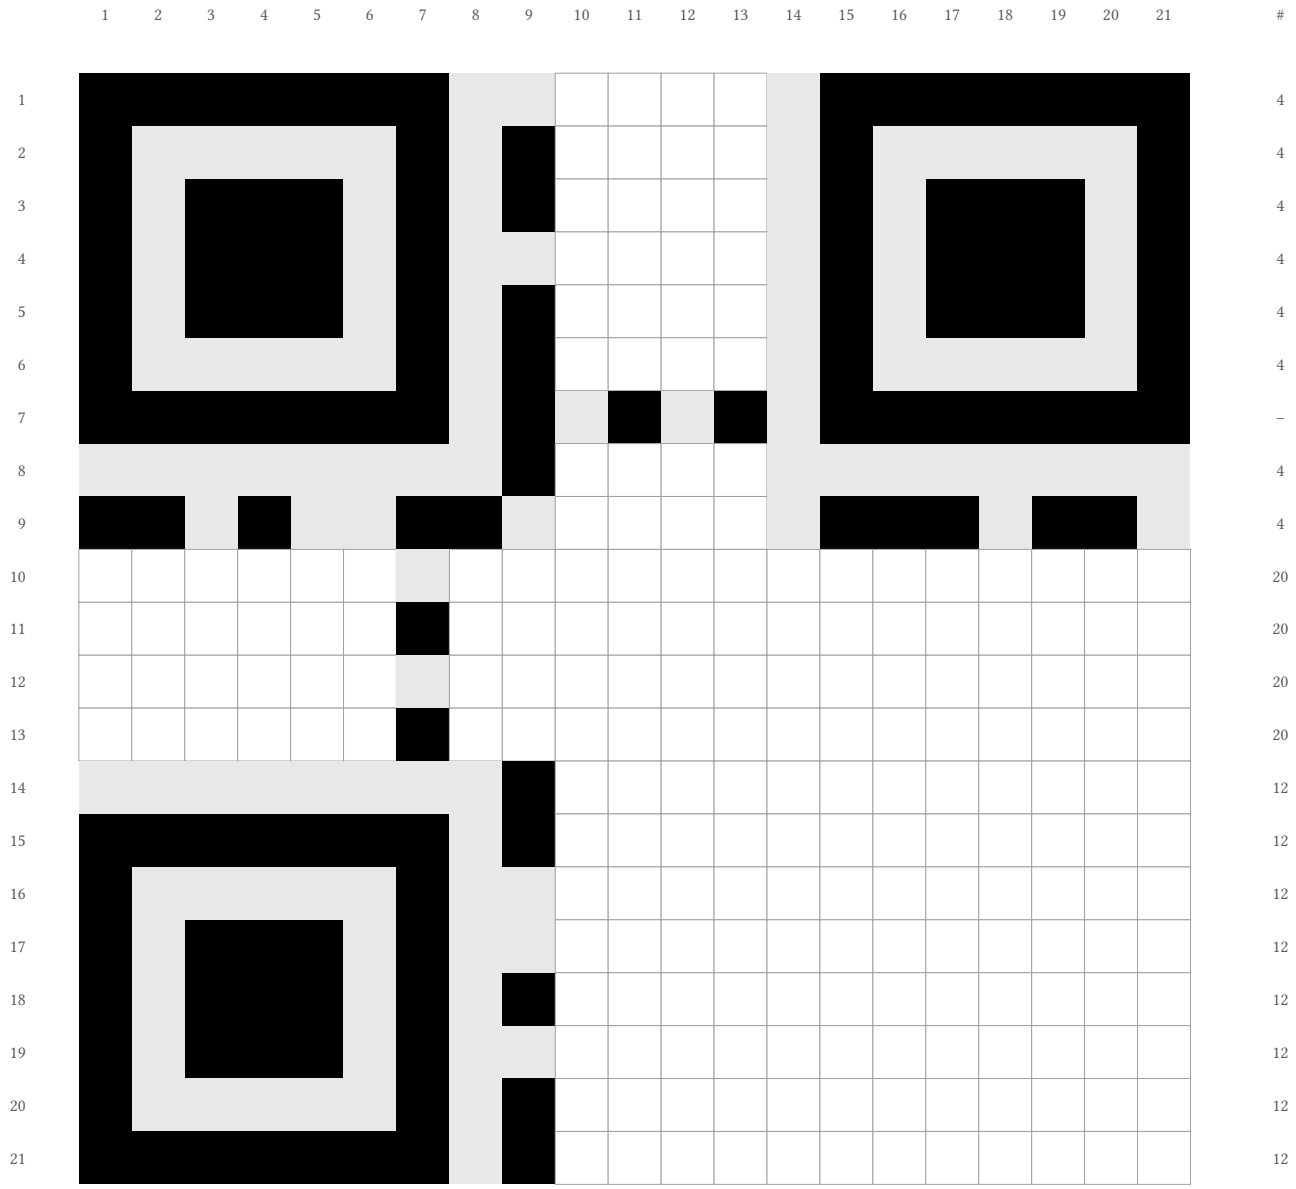

Template 21 × 21 · mask 6

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

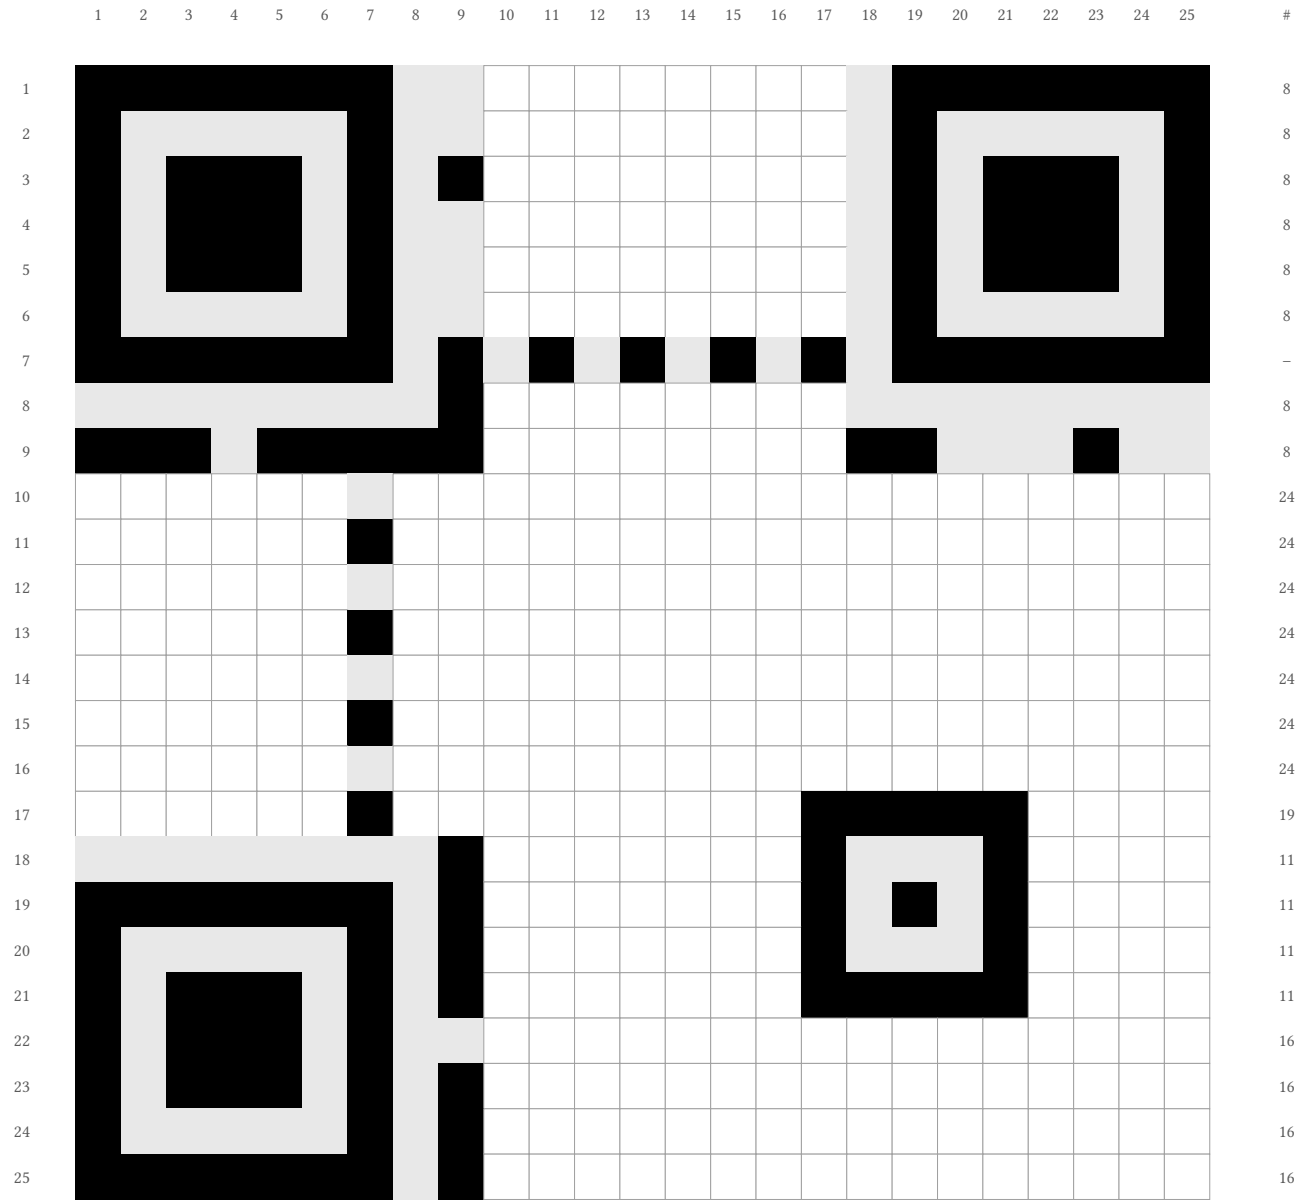

Template 21 × 21 · mask 7

CompactSeedQR · 12 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

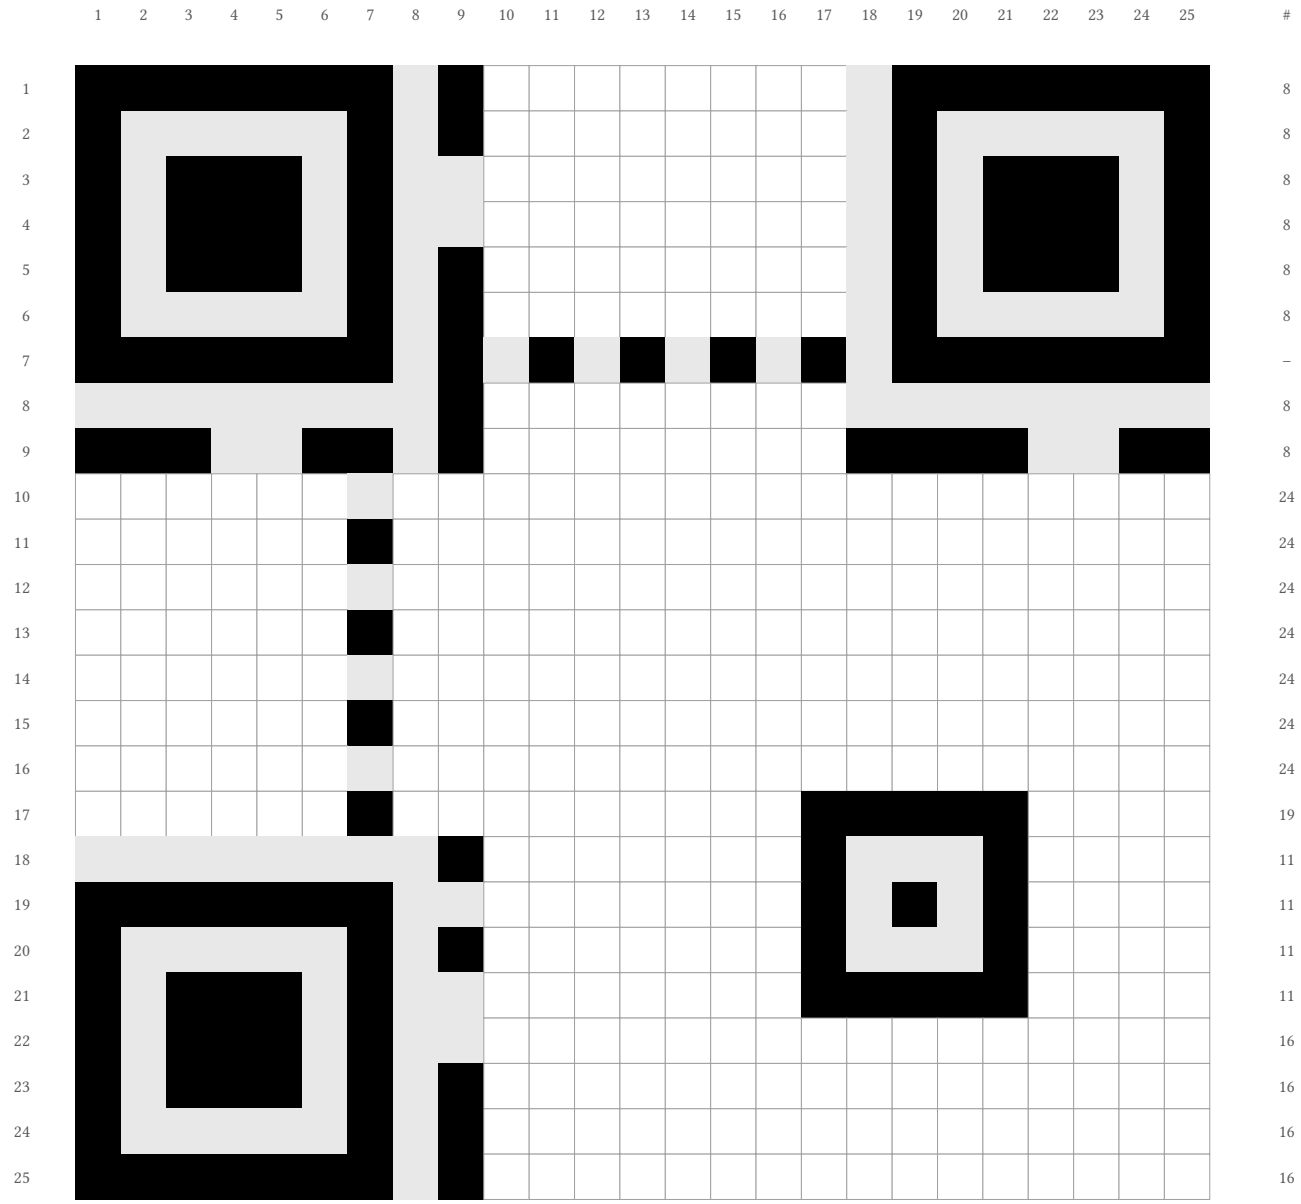

Template 25 × 25 · mask 0

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

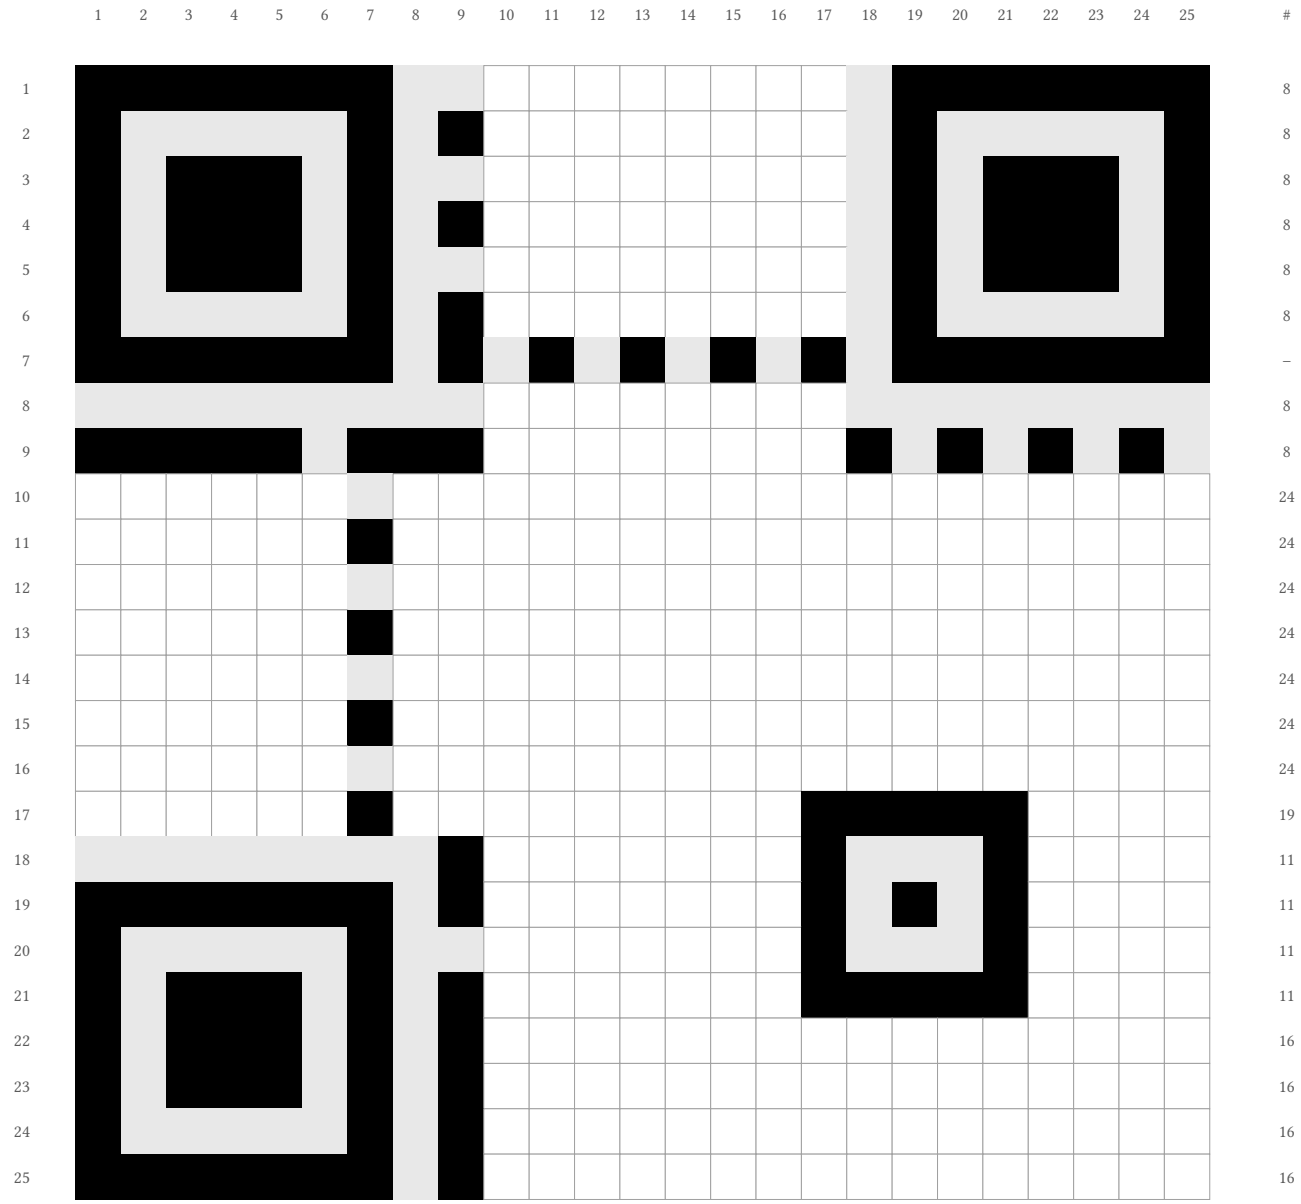

Template 25 × 25 · mask 1

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

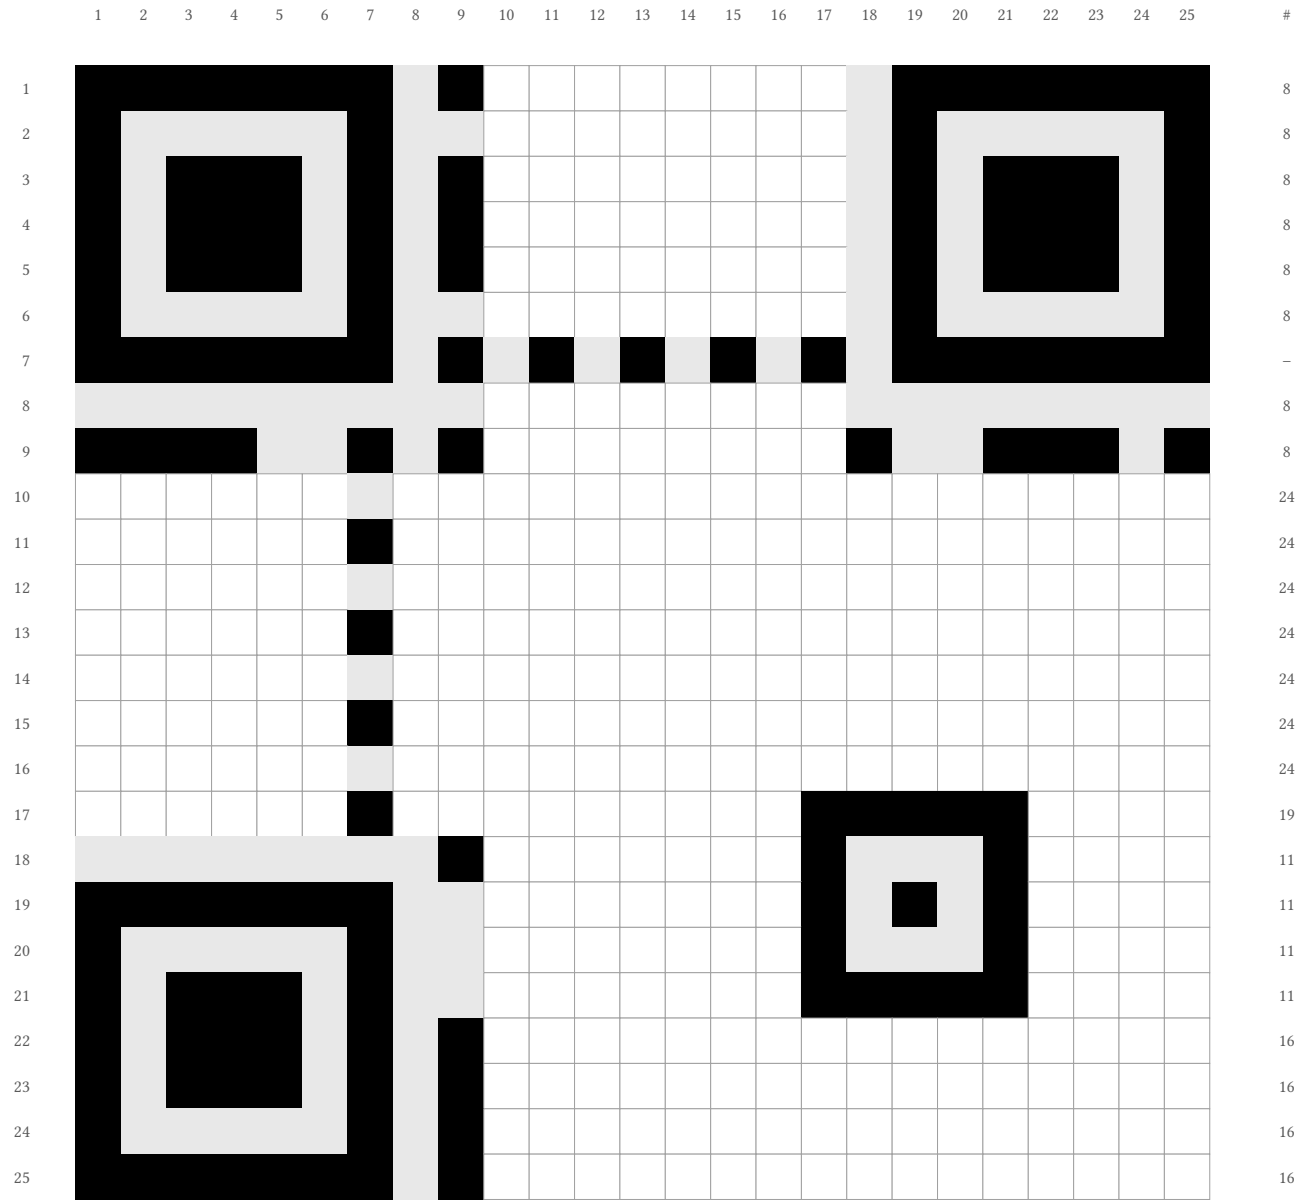

Template 25 × 25 · mask 2

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

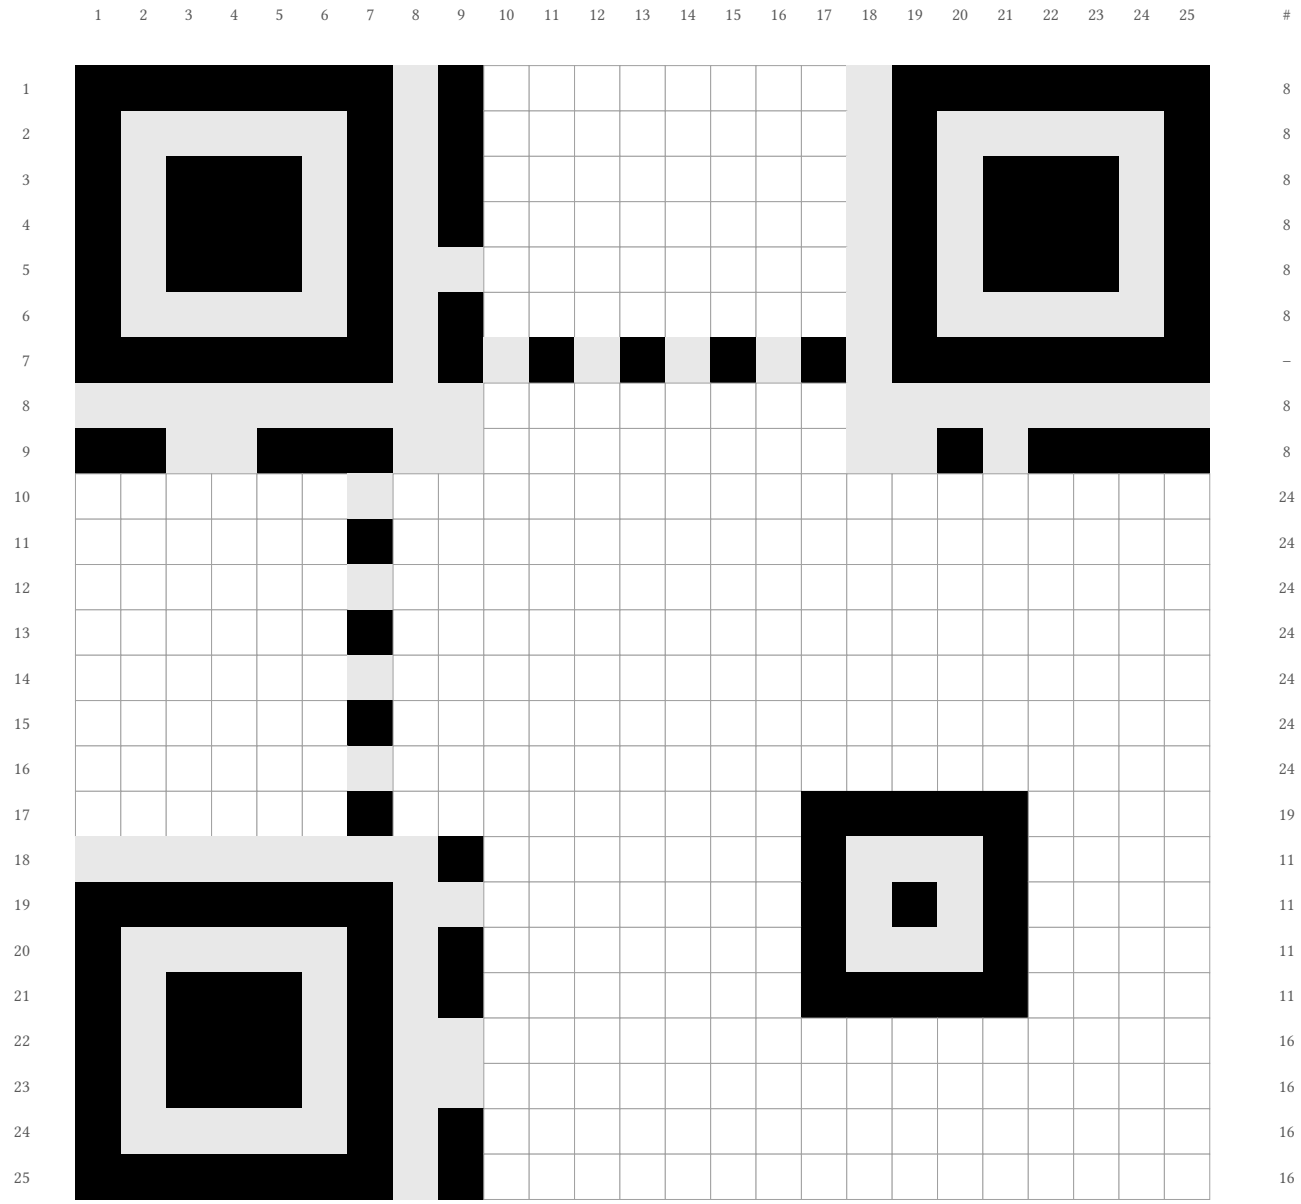

Template 25 × 25 · mask 3

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

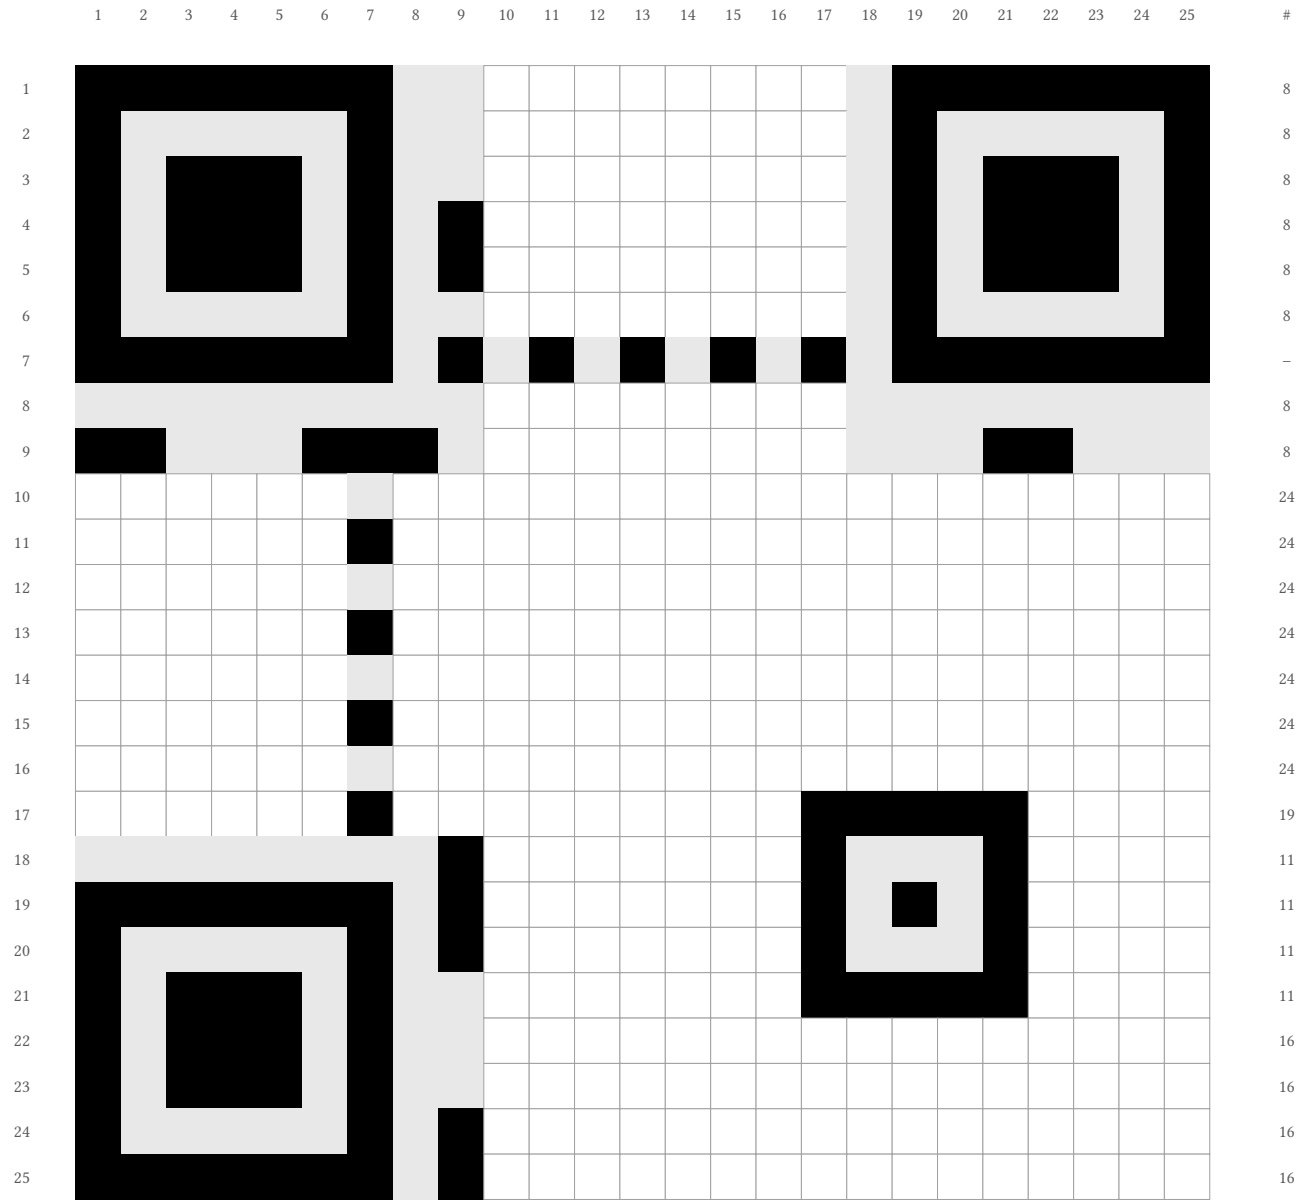

Template 25 × 25 · mask 4

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

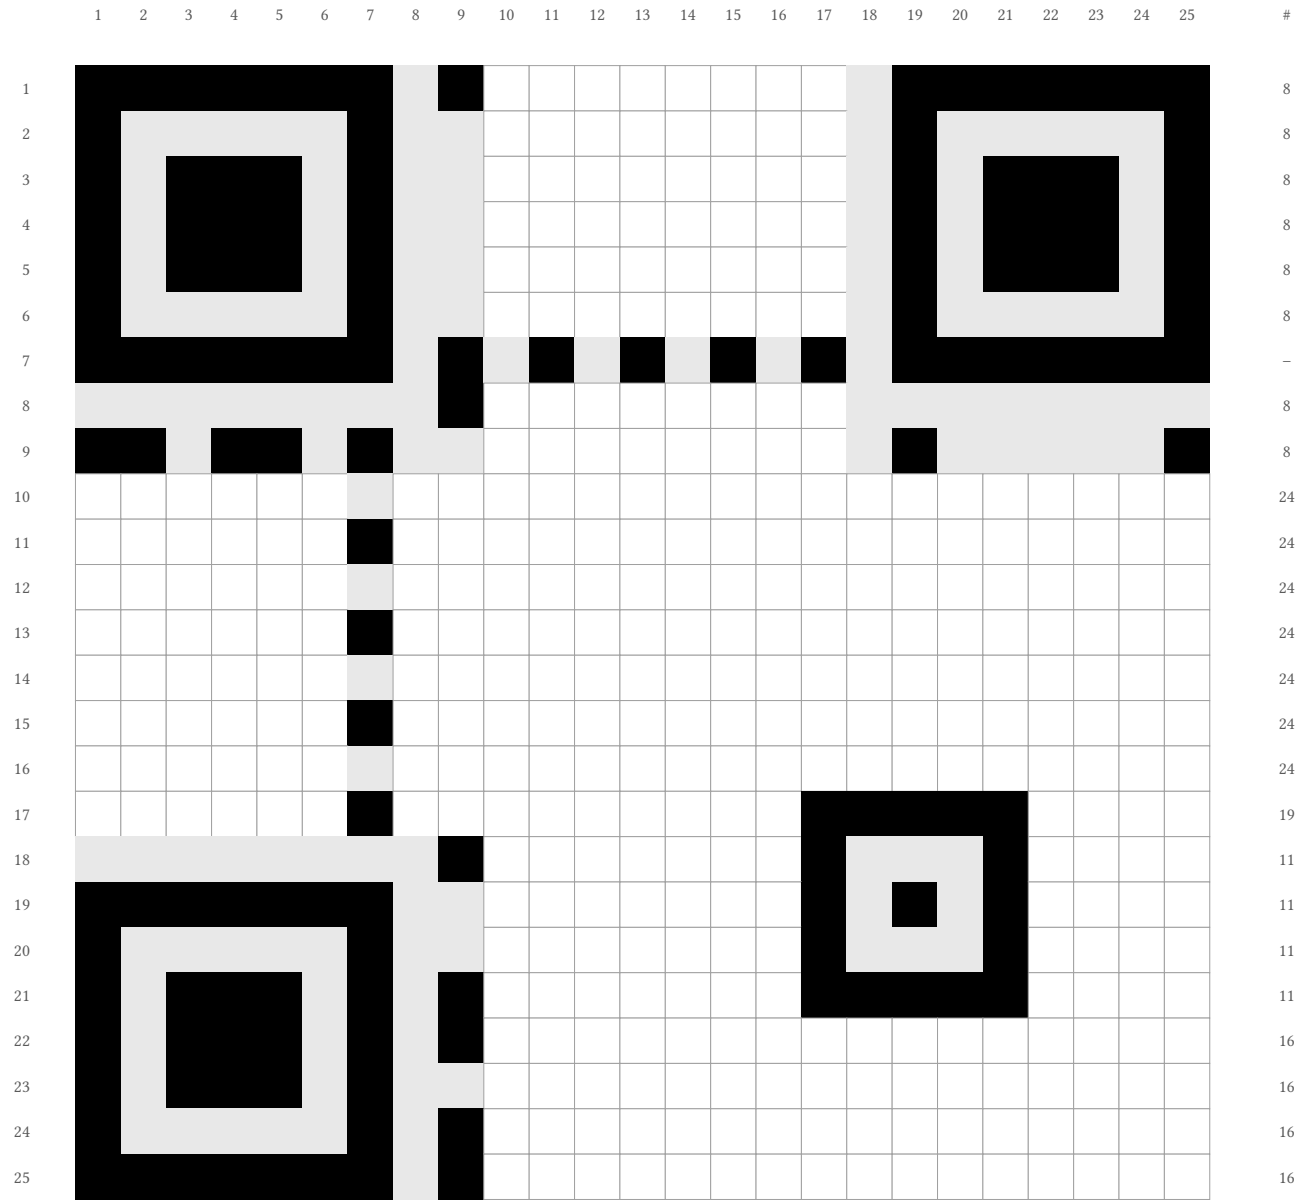

Template 25 × 25 · mask 5

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

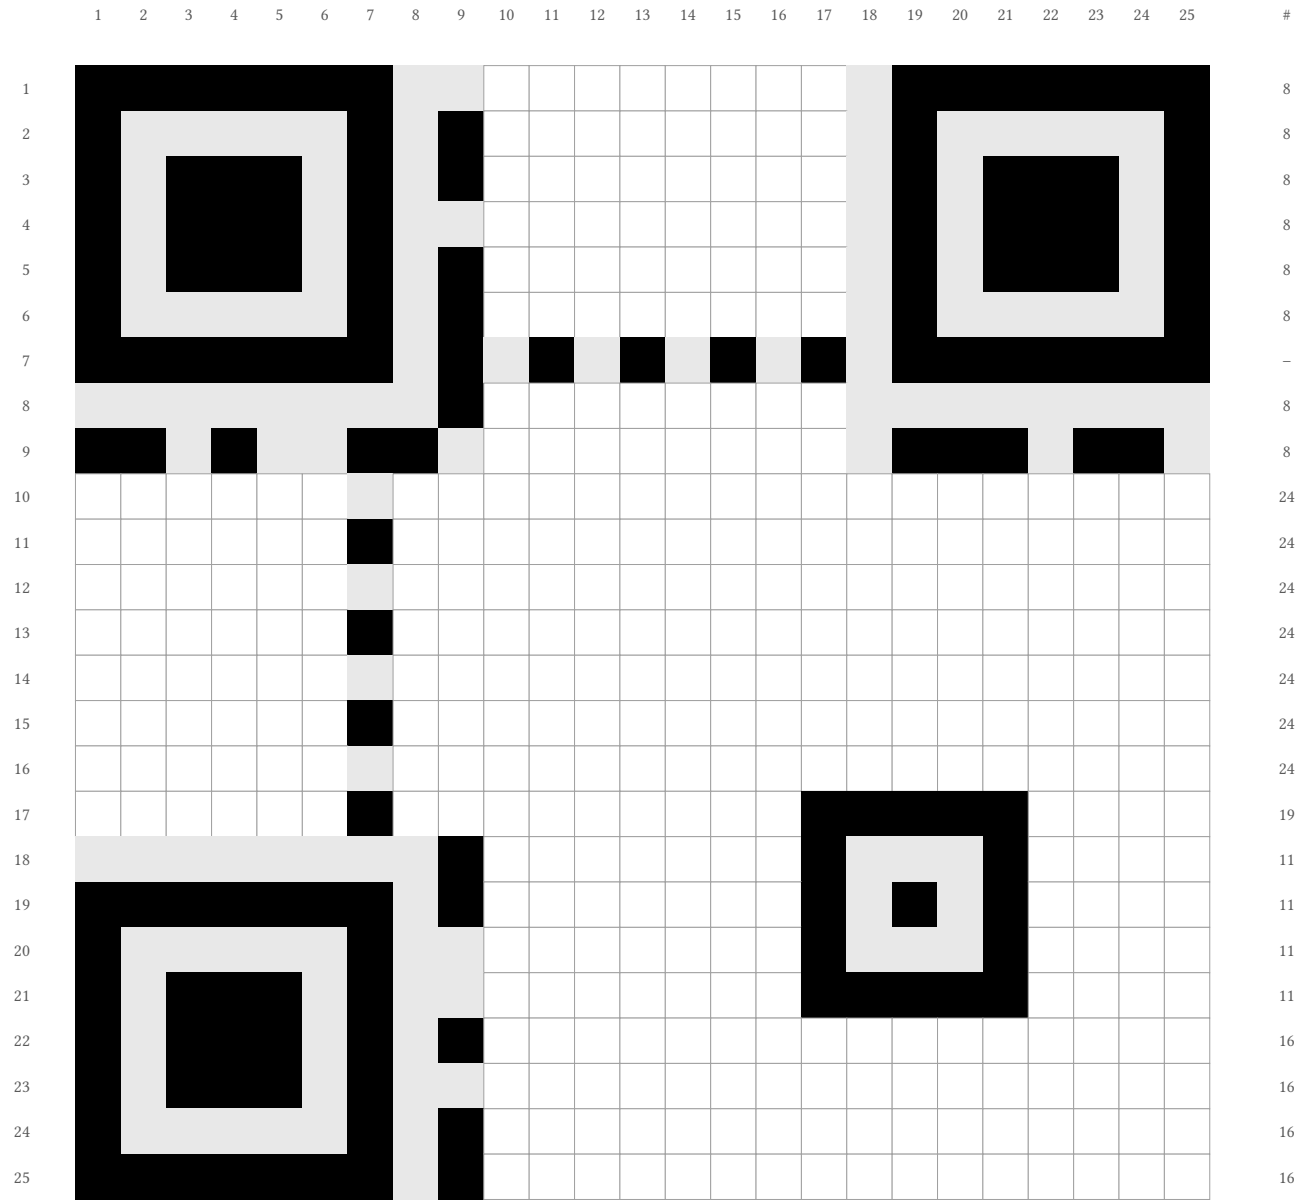

Template 25 × 25 · mask 6

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

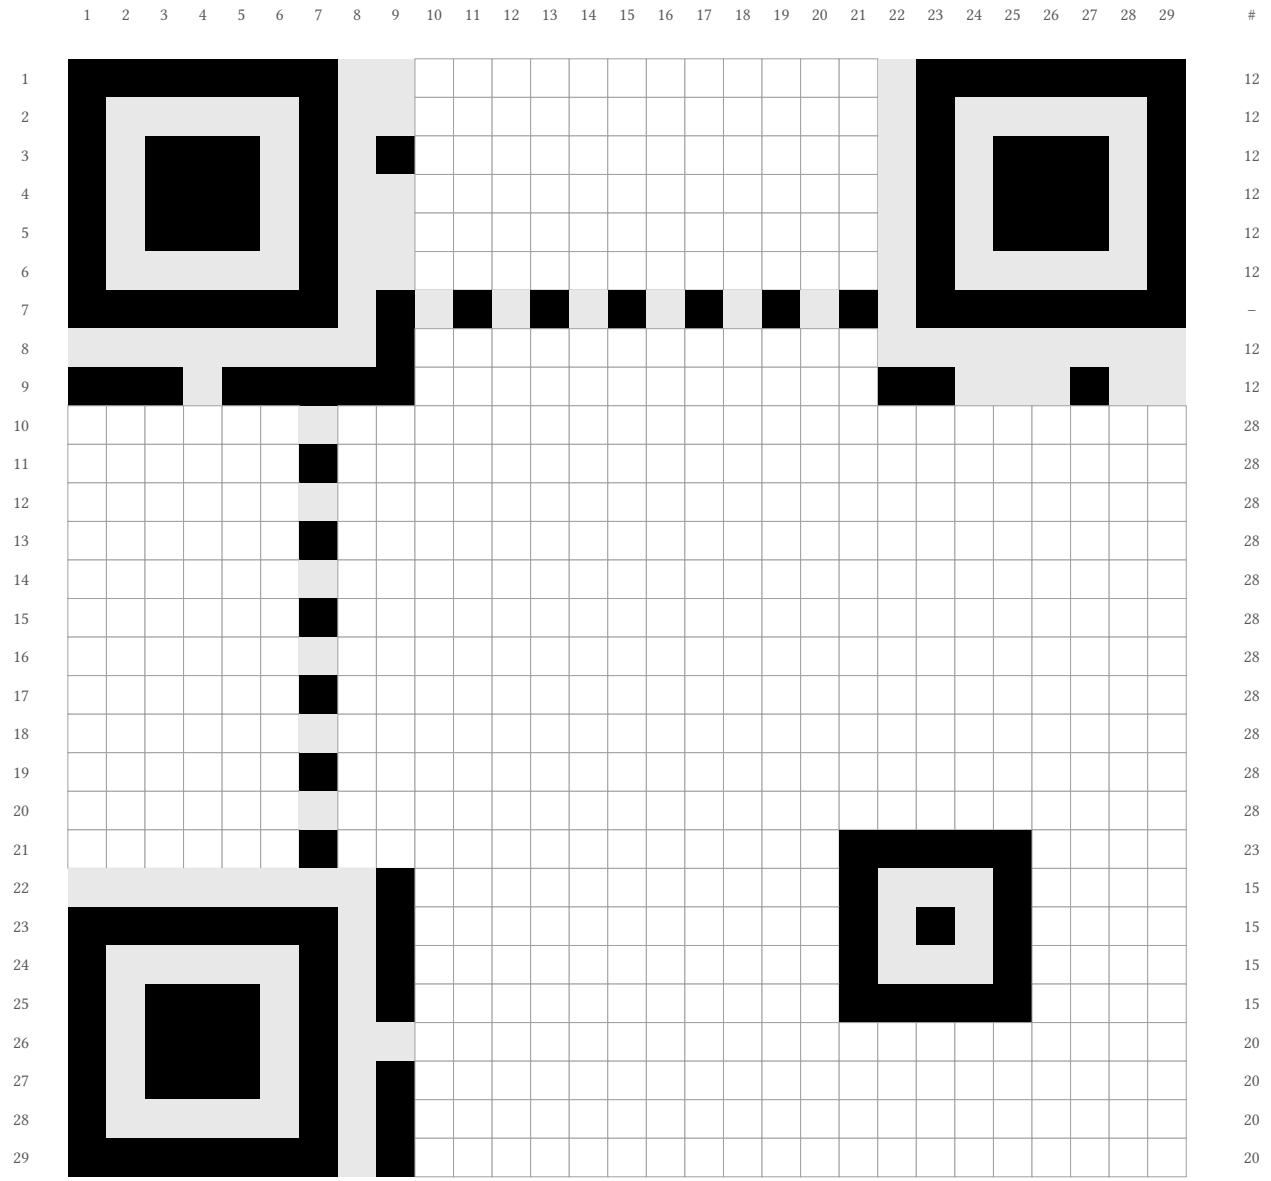

Template 25 × 25 · mask 7

Standard SeedQR · 12 words · CompactSeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

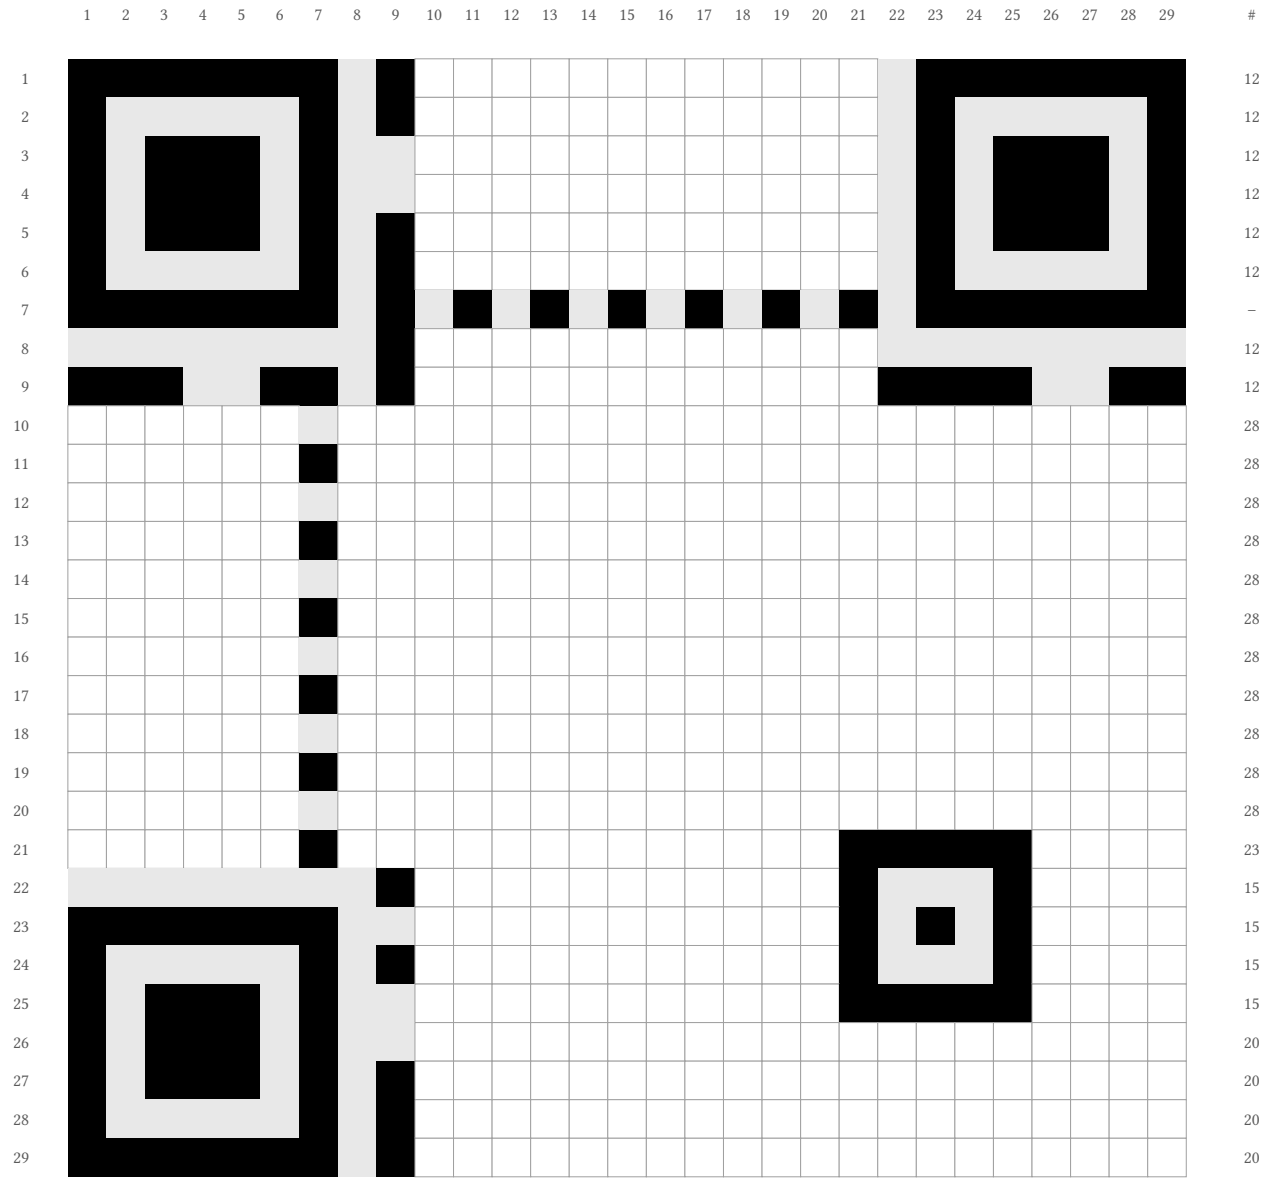

Template 29 × 29 · mask 0

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

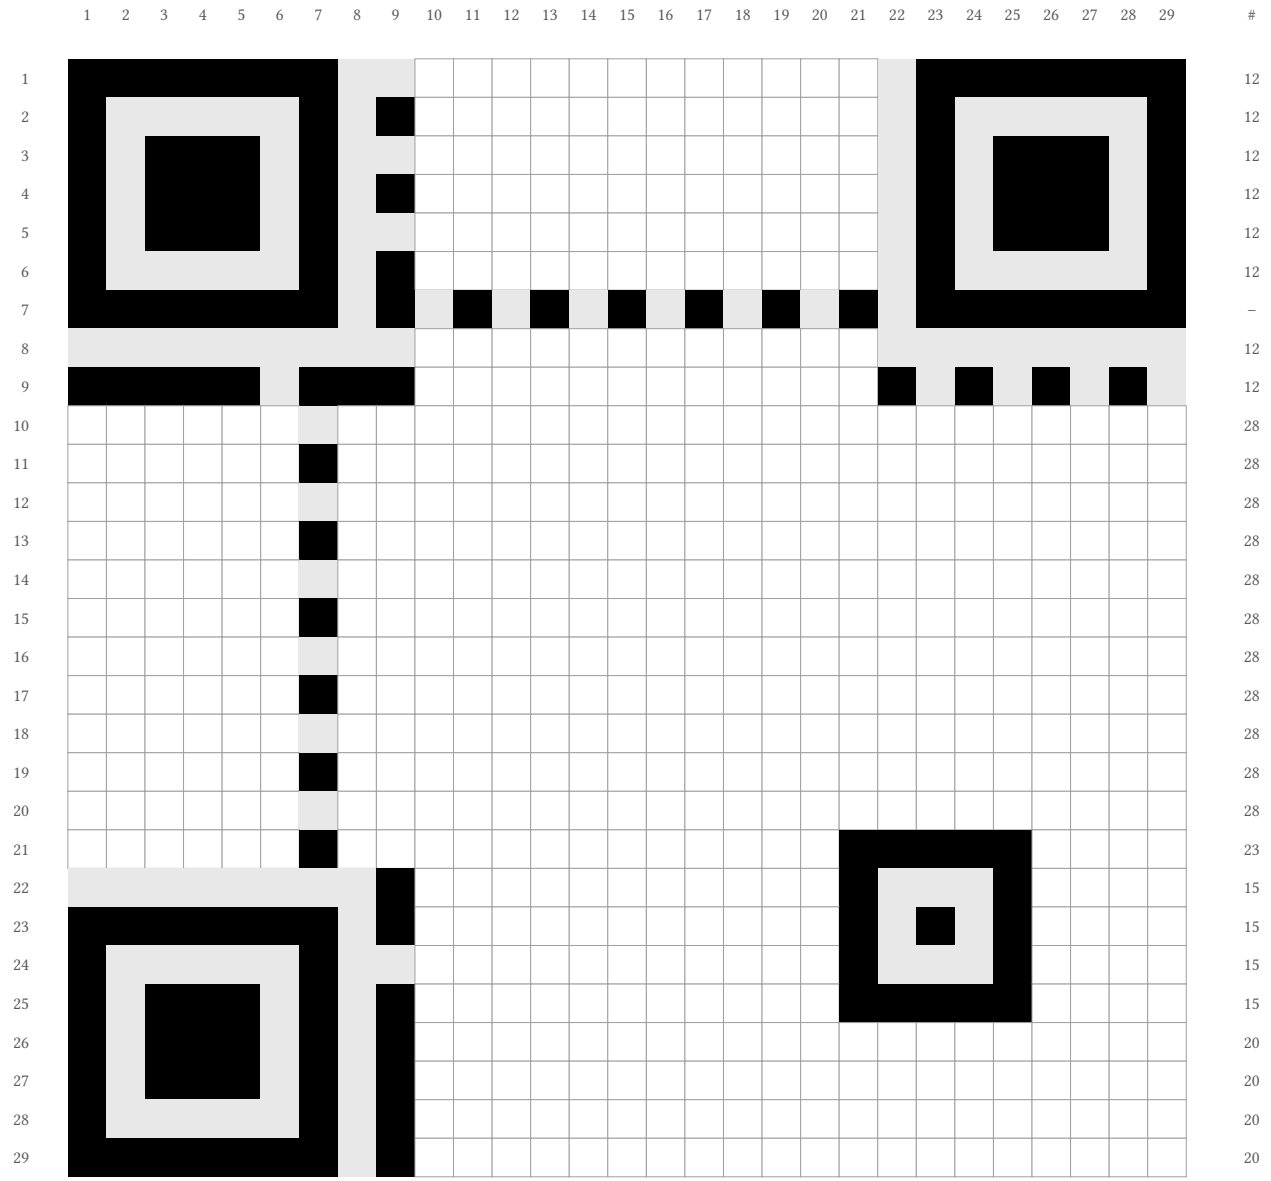

Template 29 × 29 · mask 1

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

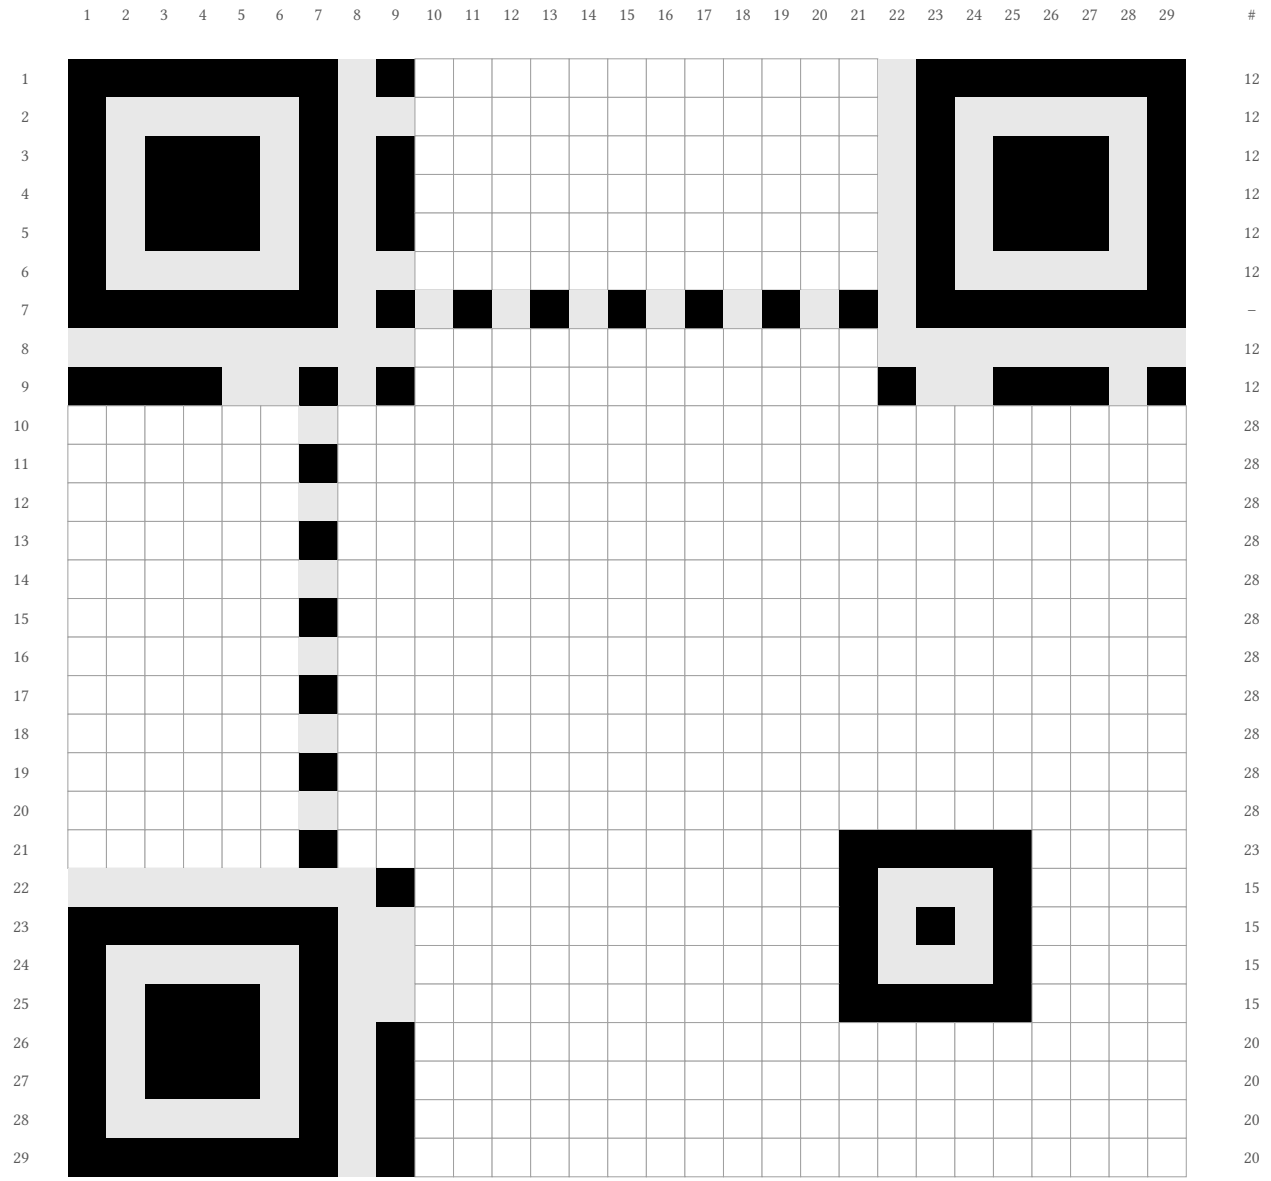

Template 29 × 29 · mask 2

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

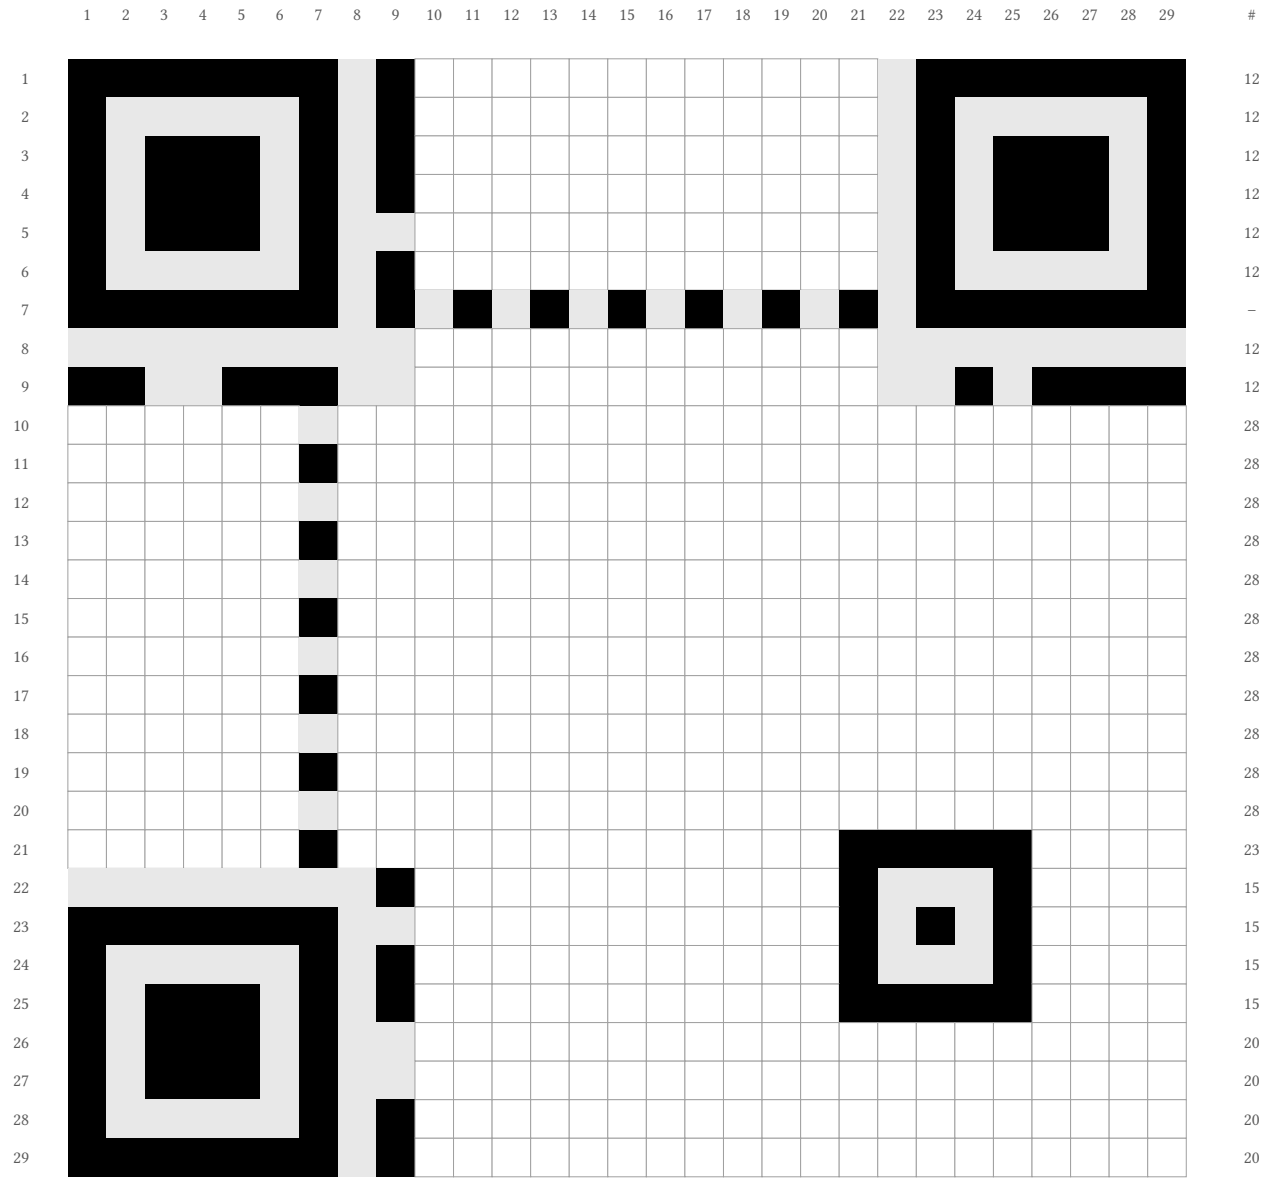

Template 29 × 29 · mask 3

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

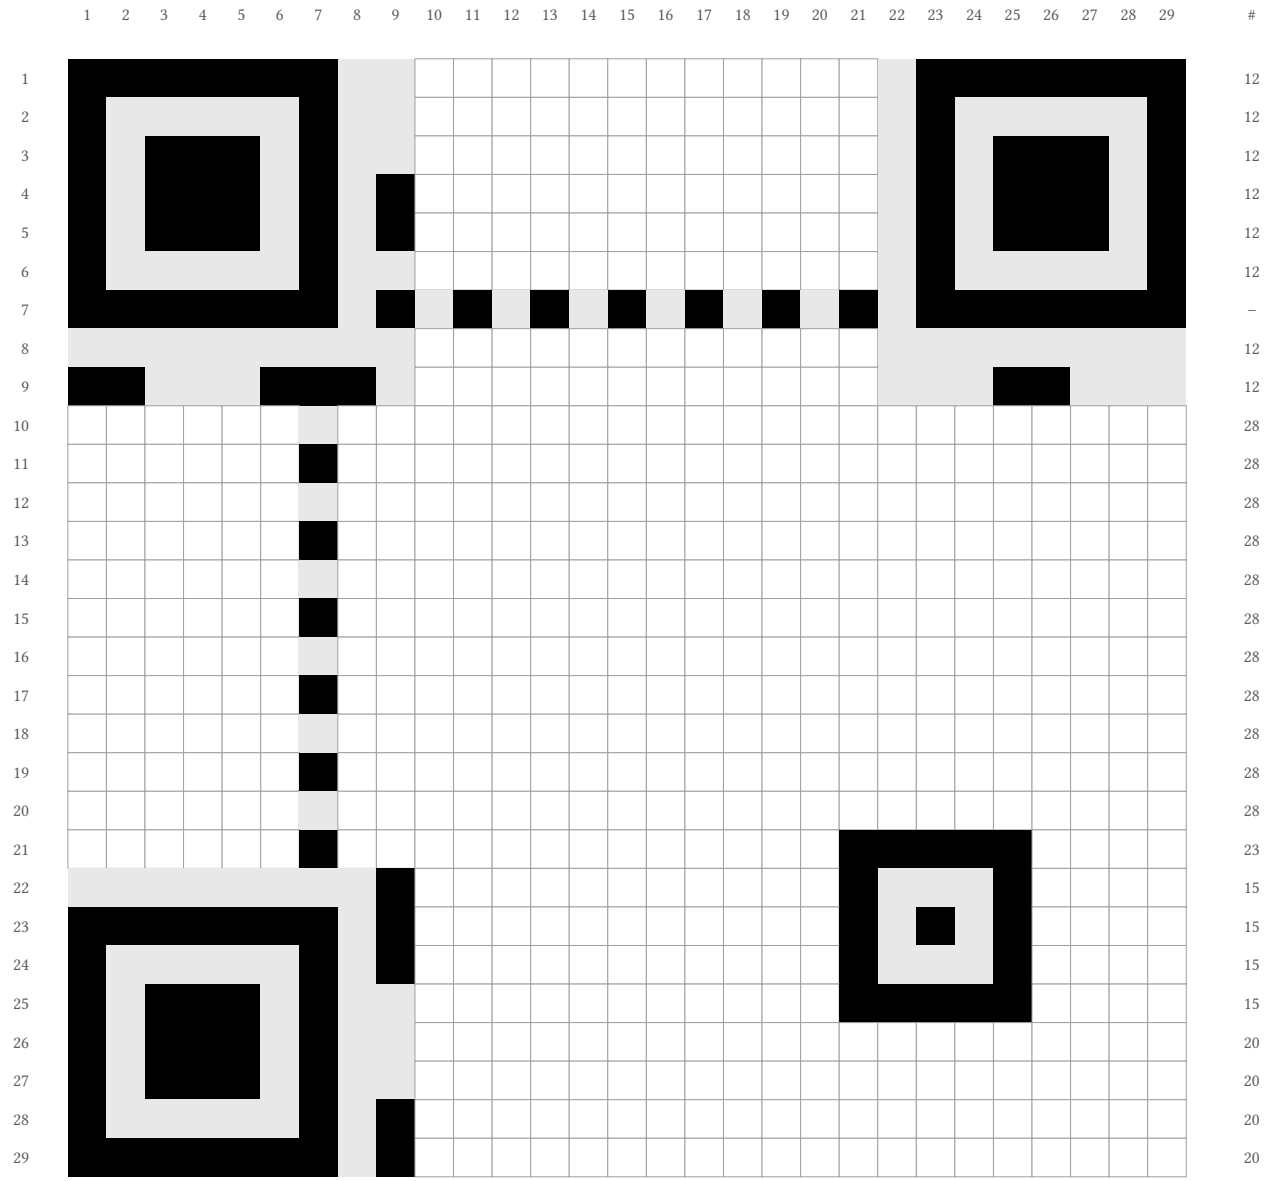

Template 29 × 29 · mask 4

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

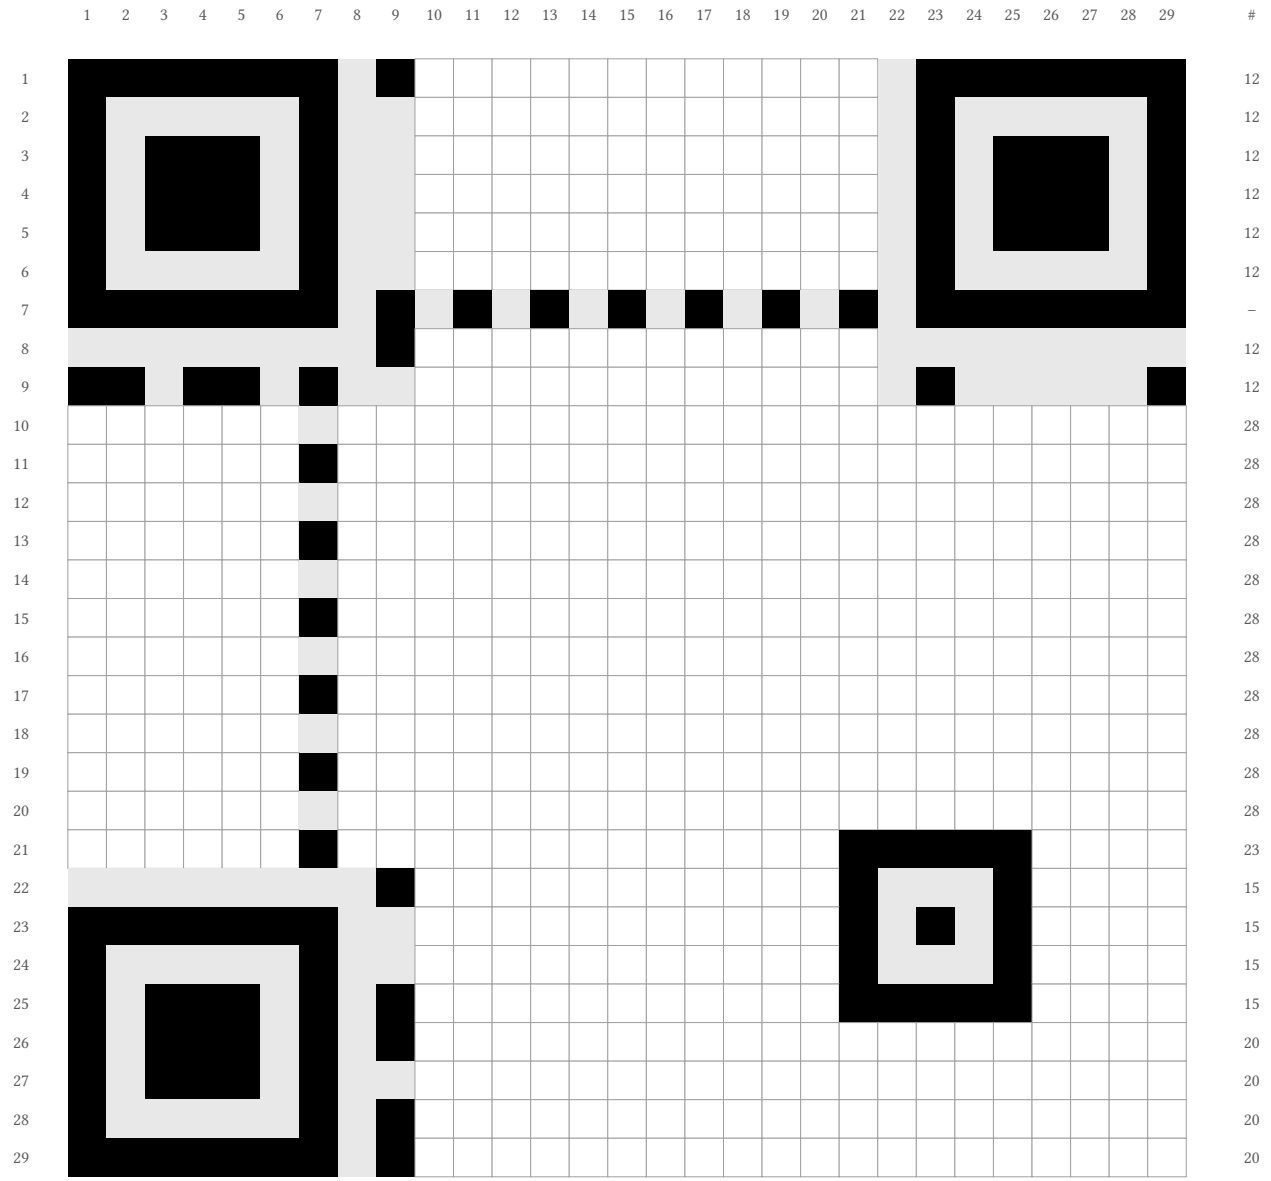

Template 29 × 29 · mask 5

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

Template 29 × 29 · mask 6

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.

Template 29 × 29 · mask 7

Standard SeedQR · 24 words · fill the white squares row by row, left to right: 1 = dark, 0 = leave white. Right column: white squares in that row.
